DEPARTMENT OF AGRICULTURE, BENGAL.

Final Forecast of the Sugarcane Crop of Bengal, 1915-16.

(Note.—On an average of the five years ending 1913-14, the area under sugarcane in Bengal represents some 9·5 per cent. of the total area under sugarcane in British India.)

Character of the Season.—Since the issue of the preliminary forecast the weather conditions have been, on the whole, satisfactory. The rainfall in August, September and October generally had a slight tendency to defect; but there was moisture enough in the fields for the growth of the crop. During August some damage was caused here and there by the excessive rainfall and floods, especially to the crop on the low-lying tracts of the Eastern Bengal districts. The fall in November was somewhat in excess, but a dry December followed.

Acreage.—The area planted with sugarcane this year is estimated to be 233,500 acres against 233,400 acres last year.

Outturn.—From the Appendix attached to the Report, it will be seen that fourteen districts report a crop between 90 and 100 per cent., seven districts between 80 and 85 per cent., and the rest between 60 and 78 per cent.

According to estimates of District Officers, the total outturn of the crop for the Province works out to 85 per cent. of the normal against 82 per cent. last year.

Taking $35\frac{1}{2}$ maunds as the normal rate of *cane-gur* per acre, the gross outturn for the Province is estimated at 5,176,600 cwts. against 4,991,700 cwts. last year.

Other sources of gur.—The total quantity of *gur* likely to be obtained this year from date palm juice is estimated at 1,983,800 cwts. and from palmyra palm juice 1,400 cwts. against 1,930,000 cwts. (revised) and 1,400 cwts., respectively, last year. The total quantity of *gur* in the Province from all sources this year is estimated at 7,161,800 cwts. against 6,923,100 cwts. (revised) last year.

Director of Agriculture, Bengal.

APPENDIX I.

Final Forecast of the Sugarcane Crop of Bengal, 1915-16.

DISTRICT.	Estimated normal area under sugarcane.	ESTIMATED AREA UNDER SUGARCANE.		TAKING 100 TO REPRESENT THE NORMAL, WHAT WOULD BE THE AVERAGE OUTTURN PER ACRE CROPPED.		Date by which the harvesting of the crop generally commenced this year, and whether that date was early, normal or late.	REMARKS BY DISTRICT OFFICERS.
		Last year.	This year.	Last year.	This year.		
1	2	3	4	5	6	7	8
	Acres.	Acres.	Acres.				
24-Parganas ...	5,100	3,300	3,800	88	100	Middle of November. Normal.	The increase in area was due to greater attention paid to sugarcane cultivation than to tapping of date trees in the Barasat subdivision. The weather has been favourable.
Nadia ...	7,900	5,700	5,700	83	98	First week of December. Normal.	The weather was favourable except in the Onuadanga subdivision where there was insufficient rainfall and the outturn is a little less than the normal in consequence.
Murshidabad ...	3,600	3,300	3,400	83	92	November to January. Normal.	The weather was favourable. The outturn is less by one anna owing to want of sufficient rain.
Jessore ...	3,900*	3,700	3,700	92	83	November. Normal.	The decrease in area as compared with the preliminary forecast is due to revision of the area in the Jhikidah subdivision. The weather was favourable on the whole. The damage caused by flood was about two annas. Hence the outturn has fallen below the normal.
Khulna ...	1,600	1,300	1,300	100	100	The weather was favourable and the outturn is expected to be normal.
Burdwan ...	25,800	23,200	23,000	75	100	Not yet commenced.	The weather has been favourable and the outturn is expected to be normal.
Birbhum ...	9,000	9,000	10,000	88	100	Not yet begun ...	The prospect of high prices of gur on account of the war led to an increase in cultivation. The weather conditions have been good.
Bankura ...	15,000	10,500	10,500	100	83	Not yet commenced.	The weather and the general condition of the crop have been fair.
Midnapore ...	3,000	3,000	3,000	90	84	Beginning of January. Normal.	The weather was not favourable owing to want of sufficient rainfall at the time of planting and for some time thereafter. The heavy rain in October and November had, however, a baneful effect on the crop. The outturn is still below the normal.
Hoghly ...	7,200	5,900	6,100	97	98	November. Normal.	The weather was favourable from July to December and its effect on the crop was fair. The outturn has slightly fallen below the normal.
Howrah ...	8,500	4,000	5,000	69	100	January. Normal.	The increase in area as compared with last year was due to extension of cultivation owing to the rise in price of sugar. The weather has been favourable and the outturn is expected to be normal.
Rajshahi ...	18,000	13,100	13,100	80	85	By the middle of November. Normal.	The weather on the whole was favourable, but the rainfall was not sufficient for the growth of the crop. Hence the outturn is below the normal.
Dinajpur ...	25,000	20,300	26,700	87	78	Beginning of December. Normal.	The decrease in area this year was due to want of timely rainfall. The weather has not been favourable. The want of sufficient rain retarded the growth of the crop. Hence the outturn is below the normal.
Jalpaiguri ...	2,300	4,300	4,300	91	100	First week of November. Normal.	The weather was generally favourable and the outturn is expected to be normal.
Darjeeling ...	100	100	100†	62	100	First week of January.	The weather has been favourable.
Rangpur ...	20,500	11,400	11,800	100	90	First week of December. Normal.	Owing to deficient rainfall in some parts of the district from July, the outturn is below the normal.
Bogra ...	20,000	20,000	20,000	80	80	Middle of January. Normal.	The weather has not been favourable. Owing to excessive and untimely rain the outturn is below the normal.
Pabna ...	10,000	10,000	10,000	80	60	By the end of December. Normal.	The weather conditions after planting were not favourable. High flood in August affected the crops very injuriously. Hence the outturn is much below the normal.

DISTRICT REPORTS ON WEATHER AND CROPS

For the week ending on the 24th January 1916.

Summary.—There was practically no rain during the week under report. Reaping winter rice is almost finished, threshing continues. Harvesting of sugarcane and *rabi* is proceeding in some districts. The preparation of fields for the next autumn is in progress. The prospects of the standing spring crops are generally reported to be fair, but light showers would improve their condition. Gratuitous relief was given to 98 persons in parts of Dacca up to date. Cattle-disease is reported from four districts only. The average price of common rice for the province has slightly risen as compared with that of the previous week.

(a) The increase is due to greater movements of pilgrims.

(b) The decrease is in merchandise general.

(c) Rs. 5,67,854 deducted being the rebate on coal, etc., for the quarter ended 31st December 1914. This adjustment was made in December 1914 instead of March 1915 in order to determine the percentage of working expenses chargeable to Tarkessur Branch Railway which has been incorporated with East Indian Railway from 1st January 1915.

IRRIGATION DEPARTMENT.

The 4th January 1916.

No. 1 Notification.—The following draft of (1) revised rules and (2) revised schedule of rates of tolls, which the Governor in Council intends to make and fix, in exercise of the powers conferred by sections 6 and 11 of the Canals Act, 1864 (Bengal Act V of 1864), and in supersession of Notification No. 2, dated the 31st March 1914, for the navigable channels of the Magra Hât Drainage scheme, as defined in Notification No. 4, dated the 22nd April 1913 (published at page 634, Part I, of the *Calcutta Gazette* of the 23rd *idlem*), is published as required by section 12 of that Act for the information of persons likely to be affected thereby.

II. The draft will be taken into consideration on or after the 16th February 1916, and any objection or suggestion which may be received by the undersigned before that date will be duly considered.

F. A. A. COWLEY,

Secy. to the Govt. of Bengal.

DRAFT RULES.

1. Every vessel entering or making use of the Magra Hât channels shall be liable to measurement for the purpose of ascertaining the tolls payable. In case of any reasonable doubt, the persons appointed by the Governor in Council as Collectors of Tolls or Navigation Canal Officers shall have authority to again measure a vessel notwithstanding that it was measured before.

2. Vessels for the purpose of determination of maundage shall be divided into three classes as follows:—

Class I—To include all vessels of the usual native types of build known as saltees, but not *bond fide* Tal (or palm tree) dongas *provided they are not used for carrying cargo*.

Class II—To include all other vessels of usual native types of build or cutters *including bholios and jolly boats*.

Class III—To include all steamers,* flats, barges, and other square-built boats.

The net maundage of every vessel, whether laden or empty, shall, for the purposes of the Canals Act, 1864, and of these rules, be determined by the following measurements:—

CLASS I.

A.—The product of one-quarter of the inside length of the vessel, measured along the centre line from stem to stern, multiplied by the interior greatest breadth of the vessel multiplied by three-quarters of the depth, measured from the top of the vessel amidships to the interior bottom of the vessel is to be taken as equal to the number of maunds upon which toll shall be levied.

B.—The measurement of the length to be made in feet, rejecting inches, and of the breadth and depth in feet and quarters of a foot, rejecting any remainder of less than a quarter of a foot.

C.—*Any vessel falling under this class, the maundage of which exceeds 50 maunds according to the above method of measurement will be given the option of compounding tollage according to the rules and rates contained in Appendices A and B or paying toll per trip as laid down for vessels of Class II in Appendix B (b); the maundage of such vessels will be determined according to the measurements laid down for Class I vessels.*

CLASS II.

A.—The product of one-quarter of the length of the vessel from stem to stern measured outside and along the water-line multiplied by the greatest interior breadth of the vessel multiplied by the greatest interior depth from the water-line to the interior bottom of the vessel, is to be taken as equal to the number of maunds upon which the tolls shall be levied.

* The word "steamer" includes all types of mechanically propelled craft such as motor boats.

B.—The measurement of the length is to be made in feet, rejecting inches, the measurement of the breadth and depth is to be made in feet and quarters of a foot, rejecting any remainder less than a quarter of a foot.

C.—The maundage on which the amount of toll is calculated shall be reckoned to the nearest integral multiple of $12\frac{1}{2}$ maunds, rejecting any remainder of less than $12\frac{1}{2}$ maunds. In the case of boats exceeding 500 maunds by measurement the maundage shall be reckoned to the nearest integral multiple of 50 maunds rejecting any remainder of less than 50 maunds.

D.—In the case of boats carrying passengers only, one foot shall be deducted from the full interior depth of the vessel, the other measurements and the calculations for maundage being made in the methods prescribed for vessels under Class II.

CLASS III.

A.—For vessels of class III, the number of maunds obtained by the system of measurement prescribed for vessels of class II shall be increased by one-half. For vessels of this class exceeding 1,000 maunds by measurement, the maundage shall be reckoned to the nearest integral multiple of 100 maunds rejecting any remainder of less than 100 maunds. In the case of steamers, the maundage determined as above shall be reduced by one-third as an allowance for engine space.

B.—In the case of steamers that have been surveyed under the Inland Steam-vessels Act, 1884, the registered tonnage entered in the certificate may be accepted as the tonnage of the steamer in lieu of measurement.

3. All vessels under class I, known and defined as saltees, will be charged under a system of compounded tollage in accordance with rules contained in Appendices A and B (except where exempted under Rule 2, Class I (C)).

Saltees if brought into the canals from outside for sale may be allowed to pass on payment of single tolls leviable for class II boats, provided that the owner applies to the Toll Collector for such single tickets.

Boats of class II not exceeding 100 maunds measured by canal maundage will be allowed the privilege of compounded tollage at the rates specified in Appendix A at the option of the Supervisor.

4. Every vessel included in classes II and III entering or passing along the canal shall be furnished with a ticket on paying the prescribed toll. The ticket shall specify the station at which it has been issued, the name of the person in charge of the vessel, the date on which the voyage commenced, the point to which the vessel may proceed on the line of navigation, the maundage of the vessel, the amount of toll charged, the number of days allowed for the voyage, and the date of such last day. The number of days so allowed without additional payment shall be calculated as follows:—

Boats.—One day for every eight miles or portion of eight miles, to be traversed together with one day for every 100 maunds of measurement or part of 100 maunds.

Floats (timber).—One day for every five miles for any number of timbers not exceeding 50, and one day for every additional 50 or part of 50.

Rafts (bamboos).—One day for every five miles for any number not exceeding 500 and one day for every additional 500 or part of 500.

5. Every vessel which does not complete its voyage within the number of days allowed by rule 4 shall, for each day or part of a day in excess, be liable to an extra charge equal to one-half of the toll payable on the maundage of the vessel as per Schedule of Rates in Appendix B, provided that in no case shall the demurrage charged exceed Rs. 5 per diem. The Superintending Engineer may, at his discretion, exempt any boats on any line of navigation, or any portion of line of navigation, from the payment required by this rule.

Exemption from payment of demurrage may, at the discretion of the Collector of Tolls, be granted for vessels detained in the channels (steamers broken down and boats damaged) by stress of weather, should immediate notice of detention, for the information of the Collector of Tolls, Magra Hat channels, be given to the nearest toll-station.

6. All tolls are payable on demand and shall be paid at the toll-station before a vessel is permitted to proceed: Provided that the Supervisor may, at his discretion, permit vessels belonging to individuals or firms of

recognized standing to proceed without prepayment on an undertaking that the bills for tollage due shall be liquidated monthly on presentation.

7. The ticket must be kept on board the vessel and must be produced for inspection when demanded by any person authorized to do so *and delivered on exit at the last toll-station, or at the branding station in the case of licensed salties, when the ticket expires.* If, on demand, the ticket is not produced, such person shall assess the tollage as provided in rule 2, and shall require payment of toll, and unless and until the toll is paid, or the original ticket or a duplicate is produced as evidence that toll has already been paid, the vessel will be liable to seizure and detention in accordance with the provisions of section 9 of the Canals Act, 1864.

8. Duplicates of lost tickets, of which the numbers and dates can be satisfactorily established, will be granted by the Collector of Tolls on payment of a sum of Re. 1: Provided that for tickets on which the total tollage is less than Rs. 4, the fee to be charged for a duplicate shall be one-quarter of the total tollage with a minimum of As. 4.

9. A vessel, which has been detained under these rules or under section 9 of the said Act, may not be removed from the place of detention without the order of the Collector of Tolls until the toll due has been paid. During such detention the manjhi, owner or agent must make arrangements for the safety of the vessel and cargo.

10. All vessels, whether the property of Government or of private owners, are liable for toll, except those exempted by the provisions of Bengal Government Circular No. 17, dated the 11th July 1906.

11. Vessels may be hauled up for repairs on the banks of the canals with the previous written permission of the Supervisor or Navigation Canal Officer. A rent calculated at one-sixth the rate of ordinary demurrage will be charged for the time the vessel occupies the bank.

12. At places where mooring posts have been provided by the Supervisor or Navigation Canal Officer, vessels desiring to moor shall be made fast in single line along the banks to such posts in such manner as the Supervisor or Navigation Canal Officer may direct, and shall not be moored in any other manner.

13. The Supervisor or Navigation Canal Officer may, by written notice to be posted at the toll offices, prohibit the dropping of anchors or the putting up of bamboos or *luggees* in any specified part of the canals or on the banks.

14. Vessels shall be allowed to make fast in single line along the canal banks in such manner as may be directed by the Supervisor or Navigation Canal Officer from time to time, and no boat shall be made fast to or be placed outside of boats so secured. No boat or raft shall be placed in such a position as to endanger the safety or obstruct the passage of other boats. Every vessel, when stationary, shall be securely fastened, and shall at all times have some person in attendance on board. Every vessel in motion shall have a sufficient crew.

15. Vessels passing through the canals shall keep in separate lines, empty boats keeping close to the bank, and those that are laden in the centre.

16. In portions of the canals where only one towing-path, exists, vessels shall moor on the side opposite to the towing-path, and the towing-path side shall always be kept clear.

17. Iron-built cargo-boats, with outside angle iron projecting beyond the wooden fenders, will not be allowed to enter the locks unless permanent fenders are fixed over the edges of the angle iron so as to prevent them from causing damage to the locks.

18. No fire, or open, unprotected light of any description shall be used on boats containing petroleum, jute, hay or straw in any place prohibited by the Navigation Canal Officer or Supervisor, and no fire, or open, or unprotected light (except in the case of steamers, the galley and engine room fires and the electric light) shall be used on any vessel while in a lock basin.

19. No person shall wilfully or negligently allow a vessel to sink in the canals.

20. In every case of a sunken vessel, whether due to negligence or otherwise, the Supervisor or Navigation Canal Officer and his subordinates shall offer every assistance in removing the same.

If in three days after the occurrence of a wreck it is seen that prompt measures are not being taken by the owner to remove the sunken vessel from the line of navigation, the Supervisor or Navigation Canal Officer and his subordinates shall make their own arrangements for the removal of the same at the expense of the owner, provided that, in cases where navigation is seriously obstructed, arrangements may be made at once to remove the wreck.

21. When a sunken vessel has been recovered, the Supervisor or Navigation Canal Officer shall cause notices to be posted at the locks, toll offices or other prominent places calling on those concerned to pay to the Collector of Tolls all toll or demurrage which may be due, as well as the expenses incurred in the recovery of the vessel and cargo. Should the sum due be not paid within fifteen days of the date of notice, the vessel and its furniture, or so much of it as may be necessary for the recovery of the dues, will be sold under the procedure directed in section 9 of the Canals Act, 1864.

22. The purchaser of a vessel sold under the provisions of section 9 of the said Act shall have the right to take it out of the canal on the day of purchase, or within such time as may be allowed by the Collector of Tolls, without payment of tolls.

23. When any laden vessel which has sunk has been recovered, or when any laden vessel has been seized under the provisions of the said Act or of these rules, the Supervisor or Navigation Canal Officer shall give immediate notice of the recovery or seizure to the owner of the cargo or his agent, requiring the removal of the cargo without delay and informing him that he will be required to pay all expenses necessary for the proper custody and storage of the cargo until removed.

24. If the Supervisor or Navigation Canal Officer be unable to ascertain the name and place of business or the abode of the owner of the cargo of such vessel, the notice prescribed in rule 21 shall be effected by a notice exhibited in his office and by advertisement in at least one English and one vernacular Calcutta newspaper *as well as a local newspaper*.

25. No steam-vessel, whose length exceeds thirty feet, shall ply in the Magra Hât channels except in the following:—Diamond Harbour Creek, Usti Nainan outfall, Nazra khal, Sangrampur khal up to Sangrampur bridge, and the Surjipur outer khal up to the Surjipur bridge.

26. *Lights and signals*.—Every vessel, whether travelling or moored in the Magra Hât channels, must, between sunset and sunrise, carry a white light in a lantern on her forepart where it can be distinctly seen from all sides. All steam-vessels in motion shall carry the lights prescribed by the Board of Trade Regulations. Barges or boats attached to a steam-vessel, whether in motion or moored, shall carry the light prescribed above.

27. *Speed of vessels*.—Every vessel plying in the Magra Hât channels must, between sunset and sunrise, limit her speed to three miles per hour. No steam-vessels shall ply between sunset and sunrise in channels detailed in rule 25.

28. No vessel shall remain in the outer entrance channels of the locks at Diamond Harbour and Ustarbhag nor in the inner lock channel and diversion channel of the Diamond Harbour lock and sluice, nor in the approach channels to any sluice. A board will be put up limiting the portion of the channels in which boats are not permitted to moor.

29. The places at which boats cannot be loaded or unloaded will be fixed by the Superintending Engineer, South-Western Circle, and will be demarcated with suitable posts and notice boards.

30. For any contravention of rules 10, 14, 15, 16, 17, 19, 20, 26, 27 and 28 and rule 9, Appendix A, the person in charge of the vessel or other person in fault shall, on conviction before a Magistrate, be liable to a fine not exceeding Rs. 50 for any one infringement, or Rs. 5 a day for any continuing infringement.

31. The channels may be closed, whenever necessary, for effecting the necessary repairs to them on one month's notice of the intention so to close them being given; but, in the event of any sudden emergency, the channels may be closed at any time without prior notice, and no claim in such cases by owners of vessels or others for compensation on account of detention or otherwise shall be entertained.

32. The term, "Navigation Canal Officer," as used in these rules, shall include all persons appointed to collect tolls under section 8 of the Canals

Act, 1864, and all Public Works officers or subordinates in charge of the channel, not below the grade of Sub-Overscer.

33. No vessel whose beam exceeds 19 feet will be permitted to enter the channels through the Diamond Harbour lock. The same prohibition will apply in the case of the Uttarbhag lock to all vessels exceeding 14 feet beam.

34. Any vessel which enters the channels through the Diamond Harbour lock for the purpose of taking refuge during stormy weather will be charged a nominal toll of annas 8 per boat, provided that the vessel leaves the channel again as soon as the weather conditions permit, and does not load or unload cargo inside the channels. All vessels seeking refuge under this rule must anchor in the creek *between the Railway Station and the Toll Collector's office* and will not be permitted to proceed up the creek without paying the usual tolls.

35. Any vessel entering the channels through the Diamond Harbour lock and proceeding to load or unload at the Diamond Harbour Railway station only will be charged tollage at the rate of annas 2 per 100 maunds to include the return journey. *Five days' time will be allowed to such boats for the complete trip in and out of the lock.* Should such boats proceed up the creek, they will be charged the ordinary tolls.

The Toll Collector, Diamond Harbour, will issue a ticket when the boat enters the creek from the lock and will collect the same when the boat leaves the creek for the lock: if the quantity of cargo carried on exit exceeds that on entry he will charge tollage at the above rate on the excess amount only.

26. *The Superintending Engineer, South-Western Circle, may fix places where boats may remain for loading and unloading cargo without payment of demurrage.*

27. *Tolls will generally be levied at fixed toll-stations, but the Supervisor of the Canals may grant licenses anywhere within the canals, provided he is personally present.*

APPENDIX A.

Rules for licensing and registration of saltees or vessels under class I.

1. As provided for under rule 3, no vessel coming under class I, rule 2, shall ply, whether regularly or only occasionally in, or partly within and partly without the limits of, the Magra Hât channels unless licensed and registered by the Collector of Tolls of the Magra Hât channels *or exempted from such registration.*

2. Every owner of a vessel or his agent or manjhi shall *present his boat* to the Collector of Tolls, Magra Hât channels, for licensing and registration giving the owner's name and residence or those of his agent duly authorized to act for him.

3. Every license granted under these rules shall continue in force for either *three, six or twelve months* from the date of issue.

4. The license is not transferable, and if the owner or manjhi or both of the vessel be changed, notice of the transfer must be given to the Collector of Tolls, the Magra Hât channels, who will endorse the change of ownership on the certificate and register free of charge.

5. The license certificate granted for a vessel shall contain the registered number of the vessel, owner's name and residence, name of *manjhi*, the maundage measurements, amount of compounded tollage and the dates of issue and expiry and shall be kept on board. It shall be produced, when required by a Navigation Canal Officer, and shall be delivered up on the expiration of the license.

6. The charge for the issue of a duplicate license to vessels in lieu of those defaced or lost shall be Re. 1.

7. The registered number of every licensed vessel shall be engraved, or branded, as well as painted in figures easily discernible on both sides of the vessel for which a charge of Re. 1 will be made. These figures shall be legibly maintained during the period of the license.

8. On the expiration of the license, the *manjhi* shall deliver up his ticket to the Toll Collector at the station from which it was issued.

9. No person in charge of any licensed vessel plying within the limits of the Magra Hât channels shall use or have any ticket resembling those granted under the authority of these rules.

10. Every renewal of a license shall, unless the Navigation Canal Officer considers it unnecessary, involve the issue of a fresh license certificate without alteration in the registered number of the vessel.

11. Every vessel under class I, found plying in the channels without being licensed and registered, shall be charged a demurrage rate of Rs. 3 for every such offence, provided that such vessel is not proceeding to the nearest toll-station for the purpose of obtaining a license and being registered. *The fine of Rs. 3 shall be in addition to the usual charge for licensing.*

J. H. KERR.

Offg. Chief Secy. to the Govt. of Bengal.

NOTIFICATION.

Delhi, the 26th January, 1916.

An Ordinance to provide for the trial by court-martial of foreigners for offences against the Defence of India Rules.

WHEREAS an emergency has arisen which makes it necessary to provide for the trial by court-martial of foreigners for offences against the Defence of India Rules;

Now, therefore, in exercise of the power conferred by section 72 of the Government of India Act, 1915, the Governor General is pleased to make and promulgate the following Ordinance:—

5 & 6 Geo.
V, c. 61

ORDINANCE No. III of 1916.

1. This Ordinance may be called the Foreigners (Trial by Court-martial) Ordinance, 1916.

Short title.

2. In this Ordinance—

- (a) "British subject" has the same meaning as in section 27 of the British Nationality and Status of Aliens Act, 1914;

Definitions.

4 & 5 Geo.
V, c. 17.

Provided that any person who holds a certificate of naturalization as a British subject granted under any Act of the Governor General in Council for the time being in force shall, for the purposes of this Ordinance, be deemed to be a British subject.

(b) "Defence of India Rules" means any rules for the time being in force made under section 2 of the Defence of India (Criminal Law Amendment) Act, 1915.

IV of 1915.

- (c) "Foreigner" means any person who is not a British subject.

3. (1) The Governor General in Council may, by order in writing; direct that a foreigner accused of anything which is an offence in virtue of the Defence of India Rules shall be tried by court-martial.

Trial of foreigners contravening rules under section 2 of the Defence of India Act, 1915.

(2) An order made under sub-section (1) may be made in respect of all foreigners or any particular foreigner or any class of foreigners; and in respect of all offences against the said rules or any particular offence or any class of offences.

(3) An order made under sub-section (1) may be made in respect of, or include, any foreigner so accused, whether such offence was committed before or after the commencement of this Ordinance.

4. When an order under section 3 has been made in respect of, or includes, any foreigner, such foreigner, when so accused, may be taken into military custody, and shall, if he is already in other custody, be handed over to military custody, and shall be proceeded against and dealt with as if he was a person subject to military law in accordance with the Army Act, and as if the offence of which he is accused was an offence against military law; and may on conviction be sentenced to, and shall be liable to suffer, any punishment assigned by the Defence of India Rules for the offence of which he is found guilty.

5. The trial and all matters precedent thereto and attendant thereon shall be held and carried out in accordance with the provisions of the Army Act and the rules for the time being in force thereunder:

Provided that the Governor General in Council may, by general or special order, modify, in such way as he may direct, any of the said provisions.

Orders by the Governor of Bengal in Council.

MUNICIPAL AND LOCAL.

NOTIFICATIONS.

No. 286.M.—The 27th January 1916.—The following draft of an order which the Governor in Council intends to make under clause (b) of section 9 of the Bengal Municipal Act, 1884 (Bengal Act III of 1884), is published for the information of persons likely to be affected thereby.

2. The draft will be taken into consideration on or after the 15th March 1916, and any objection or suggestion which may be received by the undersigned through the District Magistrate before that date will be duly considered.

Draft Order.

In exercise of the power conferred by clause (b) of section 9 of the Bengal Municipal Act, 1884 (Bengal Act III of 1884), and on the recommendation of the Commissioners of the Chittagong Municipality, in the district of Chittagong, made at a meeting, the Governor in Council is pleased to exclude from the municipal limits of the said Municipality the area the boundaries of which are specified below :—

North—A line drawn east in continuation of Abdulla Khan Lane.

South—A line drawn perpendicularly east and west through a point 100 feet north of Korbaniganj foot-bridge.

East—The line 250 feet east from high-water mark measured from the east bank of the Chaktai khal.

West—High flood-water mark of the east bank of the Chaktai khal.

II. The boundaries of the Chittagong Municipality, after excluding the said area, will hereafter be as follows, namely :—

North—Tippera pass road, Golpahar road, Katalganj road and Shaikh Abdul Khan's Lane, including an extended line of the last-mentioned road in a due east direction to high flood-water mark of the east bank of the Chaktai khal.

East—High flood-water mark of the east bank of the Chaktai khal to a point 100 feet north of the Korbaniganj foot-bridge from where the line is 250 feet east from high-water mark measured from the east bank of the Chaktai khal.

South—The Karnafuli river.

West—A line drawn along the base of the Nasirabad, Dobraghat and Khoolshi Hills and thence to the Karnafuli river, passing to the west of Dewan's Hat and east of the villages of Charia and Gosaidanga.

No. 301M.—The 27th January 1916.—The following draft of amendments which the Governor in Council proposes to make under section 86 of the Calcutta Improvement Act, 1911 (Bengal Act V of 1911), in the rules promulgated with Notifications No. 1735M., dated the 23rd December 1911, and No. 1767M., dated the 25th June 1914, for carrying out the purposes of section 82 of that Act in the Presidency of Fort William in Bengal is published for the information of persons likely to be affected thereby.

The draft will be taken into consideration on the 4th March 1916, and any objection or suggestion received by the undersigned before that date will be duly considered:—

In rule 1 *after* the words “instruments of sale” *insert* the words and brackets—

“(including certificates of sale).”

To rule 4 *add* a new clause (2), viz.—

(2) Every registering officer in Bengal, who receives and files in his Book No. I, under section 89 of the Indian Registration Act, 1908, copies of certificates of sale granted by Civil Courts and Revenue officers, shall keep a similar account of the stamp duties noted on the copies as paid under the Indian Stamp Act, 1899, and the Calcutta Improvement Act, 1911, separately.

In rule 4 *renumber* existing clause (2) as clause “(3),” and *for* the words “The said accounts” *substitute* the words “The accounts referred to in sub-rule (1) and sub-rule (2).”

No. 312M.—The 28th January 1916.—In exercise of the power conferred by section 221 of the Bengal Municipal Act, 1884 (Bengal Act III of 1884), and upon the application of the Commissioners of the Jhalokati Municipality, in the district of Bakarganj, made in pursuance of a resolution passed at a meeting specially convened to consider the question, the Governor in Council is pleased to extend the provisions of Part VI of the said Act with the exception of sections 233, 237 to 242 inclusive, 242A, 243 to 248 inclusive, clause (2) of section 252, sections 263 to 265 inclusive, 267, 271 so far as it relates to section 238, 273 so far as it relates to sections 238, 241, 242, 263, 264 and 265 and 276 to the said Municipality in the manner specified below:—

(a) all the aforesaid provisions of the said Part to the whole Municipality except the area called Chandkati; and

(b) all the aforesaid provisions of the said Part with the exception of sections 228, 236, and clause (5) of section 270 to the said area Chandkati.

2. This Notification supersedes Notification No. 2060M., dated the 19th May 1896.

No. 357M.—The 1st February 1916.—In exercise of the power conferred by clause (a) of section 59 of the Bengal Municipal Act, 1884 (Bengal Act III of 1884), the Governor in Council is pleased to approve the resolution passed by the Commissioners of the Faridpur Municipality, in the district of Faridpur, under section 23 of that Act, electing Babu Mathura Nath Maitra, B.L., to be their Chairman.

No. 359M.—The 1st February 1916.—In exercise of the power conferred by clause (a) of section 59 of the Bengal Municipal Act, 1884 (Bengal Act III of 1884), the Governor in Council is pleased to approve the resolution passed by the Commissioners of the Madaripur Municipality, in the district of Faridpur, under section 23 of that Act, electing Babu Mono Mohan Gangali to be their Chairman.

No. 364M.—The 1st February 1916.—In exercise of the power conferred by section 37G of the Bengal Municipal Act, 1884 (Bengal Act III of 1884), the Governor in Council is pleased to sanction the scheme submitted by the Commissioners of the Suri Municipality for providing drainage to a portion of that Municipality, the particulars of which were published with notification No. 2145M., dated the 6th September 1915, at page 261 of Part IB of the *Calcutta Gazette* of the 8th idem.

No. 275M.—The 26th January 1916.—The following draft of rules which, in exercise of the power conferred by section 290 of the Bengal Municipal Act, 1884 (Bengal Act III of 1884), the Governor in Council proposes to make, and subject to which the Commissioners of the Chittagong Municipality may allow communication-pipes to be laid down from the service-pipes of the Commissioners for the purpose of leading water to premises for domestic purposes only, are published for the information of persons likely to be affected thereby.

II. The draft rules will be taken into consideration on the 15th March 1916, and any objection or suggestion which may be received by the undersigned through the District Magistrate before that date will be duly considered.

Rules for the grant to private premises of house-connections for domestic purposes in the Chittagong Municipality.

So long as the Commissioners deem it practicable and consistent with the maintenance of an efficient water-supply, they may allow the owner or occupier of any holding paying a water-rate imposed under the provisions of Part VII of the Bengal Municipal Act, 1884, on the annual value of such holding, when such annual value is not less than Rs. 60 or such higher amount as may be fixed from time to time by the Commissioners at a meeting, to lay communication-pipes from the service-pipes of the Commissioners for the purpose of leading water to such holding for domestic purposes only, subject to the following rules and conditions:—

1. The owner or occupier of any holding requiring water to be laid on to such holding for domestic purposes, or requiring any addition or alteration to an existing water-supply, must apply for the same on a printed form to be supplied free of cost at the Municipal office; and work must be commenced within three months from the date of sanction, failing which the sanction shall be deemed to be withdrawn, and a fresh application and sanction shall be required.

2. Before any work is commenced every such owner or occupier must pay to the Commissioners a sum of Rs. 50 to cover the cost of testing and inspection, or such higher fee as the Commissioners in meeting may from time to time direct, under section 301 of the Act, for each new connection, and also a fee of Rs. 5 per 100 rupees on the cost of each addition to, or alteration in, an existing connection, such fees to be in addition to all other costs and charges imposed under these rules.

3. The work required may, at the option of the Commissioners, either be carried out by the Commissioners themselves at the expense of the owner or occupier of the holding in respect of which the work is required, or may be carried out by a person or firm employed by such owner or occupier and approved by the Commissioners.

4. (1) The owner or occupier of the holding in respect of which the connection is required must bear the entire cost thereof, including the cost of the supply and fixing of the fittings referred to in rule 9.

(2) The applicant for the connection will also be liable for the cost of such alterations in, or repairs to, roads, drains, sewers, gas or water-mains, or pipes, and the cost of such other works as may be necessitated by, or result from, the work of making such connection, and also all charges for which the Commissioners may become liable in respect of any of the matters referred to in this sub-rule.

5. The owner or occupier of the holding to which a connection has been given must at any time, on receipt of notice to do so from the Commissioners, pay the entire cost of any repairs or alterations to the connection or any part thereof that the Commissioners may consider necessary to put it into a satisfactory condition or which may be necessitated by any change to the municipal water-works or system of distribution, or by the defective condition of the connection or any part thereof, or by any other cause whatever.

6. Except as provided below, each holding must have a separate connection to the municipal main supply-pipe, and extensions from the communication-pipe of one holding to another holding shall not be permitted:

Provided that, with the consent of the Commissioners in meeting, connections to two or more holdings may be permitted from a common communication-pipe. Any such communication-pipe must be laid in a street or common passage, and a stop-cock and meter, as provided for in rule 9 hereof, must be fixed on the connection to each holding;

Provided also that no holding shall have more than one separate connection, but if in any case the Commissioners are satisfied that an adequate supply to any holding cannot be given through a single connection, they may sanction a second connection thereto.

7. Every connection with municipal water-mains must be made under the supervision of an officer appointed by the Commissioners in this behalf, and no such connection shall be made except at such time as may be appointed and in such position as may be selected by an authorized Municipal officer.

8. No connection shall be allowed to the rising main except with the permission of the Commissioners at a meeting.

9. A holding connection shall comprise the following parts or fittings:—

- (a) a brass or gunmetal ferrule inserted in the main supply-pipe;
- (b) a galvanized-iron communication-pipe from the ferrule to the meter;
- (c) a stop-cock and its surface-box;
- (d) a meter;
- (e) service-pipes from the stop-cock to the taps; and
- (f) taps.

10. All the fittings referred to in rule 9 shall be exact duplicates of standard samples kept in the office of the Commissioners and approved by them in meeting.

11. All fittings shall be inspected and tested and stamped by an officer of the Municipality before being fixed.

12. If any owner or occupier shall desire to adopt any fitting of a pattern different from the standard patterns, he must present such fitting for the approval of the Chairman; and any fittings so presented may, if considered satisfactory by the Chairman, be stamped, and samples thereof may be purchased and placed among the standard fittings.

13. The size of the ferrule and the diameter of the communication-pipe referred to in clauses (a) and (b) of rule 9 and the number of taps should be fixed in accordance with the annual valuation of holdings as follows:—

Annual valuation of holding.		Size of ferrule.	Diameter of communication- pipe.	Number of taps.	
Under Rs. 200	$\frac{1}{4}$ "	$\frac{1}{2}$ "	2
From Rs. 200 to 499	$\frac{3}{8}$ "	$\frac{5}{8}$ "	3
„ Rs. 500 to 799	$\frac{1}{2}$ "	$\frac{3}{4}$ "	4
„ Rs. 800 to 1,199	$\frac{5}{8}$ "	$\frac{7}{8}$ "	5
„ Rs. 1,200 to 1,999	$\frac{3}{4}$ "	1"	6
„ Rs. 2,000 to 3,000	$\frac{7}{8}$ "	1"	7

Over Rs. 3,000 one additional tap for every additional Rs. 1,000 in the annual valuation of the holding:

Provided that though the communication-pipe shall not ordinarily be more than $\frac{1}{4}$ " larger in diameter than the ferrule, yet the Engineer may, under special circumstances, fix the sizes of the communication-pipe with reference to the length of the pipe and the prevailing pressure.

14. The holding connection, when fitted in position, must be capable of standing a pressure of 125 feet; and no water shall be supplied until this test has been applied in the presence of an officer appointed by the Commissioners to inspect such fittings.

15. (a) On every communication-pipe, a brass or gunmetal stop-cock, having the same waterway as such pipe, shall be placed as near as practicable to the point where that pipe enters the holding.

(b) The stop-cock shall be built in a brick chamber provided with a surfacecover box so designed that it can be locked, and the key of this box shall remain under the control of the Chairman.

(c) The stop-cock shall be capable of adjustment so that the supply to the holding may be regulated thereby.

16. (a) The meter shall be placed as near to the stop-cock as possible and in a position where it can be conveniently examined.

(b) The meter must be fixed in a brick chamber covered over with a surface-box of approved pattern.

17. Neither the stop-cock nor the meter must be placed in any private premises.

18. The Commissioners shall depute an authorized person to read every meter not less than once a quarter, and shall give notice to the occupier at least twenty-four hours before the reading is recorded.

19. Every tap shall be of the same size as the pipe to which it is attached, and shall be of brass and of the pattern known as screw-down, or of such other pattern as may from time to time be approved by the Commissioners at a meeting. Every tap shall, except with the special permission of the Commissioners, be at least three feet above the surface of the ground beneath.

20. No communication-pipe or service-pipe shall be laid along or adjacent to any drain or watercourse, or in any place where, in the opinion of the Engineer, there is risk or likelihood of the water in such pipe becoming contaminated.

21. Whenever a communication-pipe has to be laid across a sewer or open drain, or in any place where, in the opinion of the Engineer, it is liable to injury, such pipe must be passed through a cast-iron pipe of sufficient length and strength to afford due protection.

22. No cistern, tank or reservoir of any description, which is intended to be supplied with water from the municipal waterworks, shall be permitted to any holding except with the sanction of the Commissioners in meeting, and such sanction shall distinctly specify the dimensions and capacity of the cistern, tank or reservoir allowed. The inlet to every such cistern, tank or reservoir must be controlled by an efficient ball-cock so that the discharge thereinto is completely stopped when the cistern, tank or reservoir is full. Any tap fed from such cistern, tank or reservoir must be included in the number of taps allowed under rule 13.

23. (1) Every owner or occupier of any holding in respect of which a connection has been made under these rules shall be entitled to a supply of—

(a) three thousand gallons of water per quarter for each rupee, and

(b) a further proportionate number of gallons per quarter for every additional fraction of a rupee, paid by him quarterly as water-rate in respect of such holding.

(2) For all water in excess of the amount allowed under sub-rule (1) such owner or occupier shall be charged quarterly as follows:—

	Per 1,000 gallons. As.
For any excess quantity of water not exceeding 50 per cent. of the amount of the allowance prescribed in sub-rule (1) ...	8
For any excess quantity of water exceeding 50 per cent. of the amount of the allowance prescribed in sub-rule (1), but not exceeding that amount ...	12
For any excess quantity of water exceeding the amount of the allowance prescribed in sub-rule (1) ...	16

24. The Commissioners may cut off the connection between any waterworks of the Municipality and any holding to which water is supplied from such works, or may turn off such supply in any of the following cases, namely:—

(a) If the holding is unoccupied.

(b) If the occupier refuses to admit any officer duly empowered in that behalf into the holding for the purpose of making any examination or inspection authorized under this Act, or under any bye-law or rule framed under this Act, or prevents such officer from making such examination or inspection.

- (c) If the owner or occupier of the holding touches or interferes with his meter in any way except with the permission of the Chairman, or wilfully or negligently injures or damages it.
- (d) If the owner or occupier of the holding wilfully or negligently permits waste of water in such volume as will, in the opinion of the Chairman, endanger the water-supply in the neighbourhood.
- (e) If the owner or occupier of any holding which is supplied with water under these rules shall refuse or neglect to pay any of the fees or charges imposed in accordance with these rules for a space of fourteen days after he has been served with a notice of demand for the same.
- (f) If the owner or occupier of the holding constructs or fixes any cistern, tank, reservoir, taps, pipes or any other works in connection with the water-supply not authorized by these rules.
- (g) If the pipes, taps, ball-cocks, cisterns, or any other parts of the connection are, in the opinion of the Commissioners, in a leaking condition or a state of disrepair:

Provided that such disconnection or turning off of water-supply shall not relieve any person from any liabilities which he may have incurred under these rules.

In the circumstances contemplated in clause (d), an officer authorized by the Commissioners in this behalf by a general order shall have the power to turn off the supply for a period not exceeding eight hours, on his previously recording his reason in writing.

25. In all cases in which disputes arise as to the size or quality of pipes or fittings, or in which these rules do not apply, an appeal against the orders of the Chairman or Engineer, as the case may be, shall lie to the Commissioners in meeting, whose decision shall be final, provided that no appeal shall lie against an order passed under rule 24. unless and until such order has been complied with.

26. No connection shall be allowed to any holding unless the Engineer is satisfied that such holding is provided with means of efficient drainage for waste water.

CORPORATION OF CALCUTTA.

NOTICE.

THE General Committee having, under section 350 (1) of the Act III (B. C.) of 1899, previously given public notice of their intention to modify the definition of the alignment of a portion of Upper Chitpore Road between Raja Rajbullub Street and Ram Kanto Bose Street, and no objection having been received within the date specified for receiving the same, do hereby order that the revised alignment shown in the plan approved by the General Committee on the 13th January 1916 be defined under section 350 (4).

C. F. PAYNE, *Chairman.*

MUNICIPAL OFFICE, *the 25th January 1916.*

CORPORATION OF CALCUTTA.

THE following revised rules, relating to the Provident Fund, have been made by the Corporation of Calcutta under section 73 (c) of the Calcutta Municipal Act and have been sanctioned by the Government of Bengal. They will come into force from the 1st February 1916.

They are published in compliance with the provisions of section 570 of the Calcutta Municipal Act.

C. F. PAYNE, *Chairman of the Corporation.*

MUNICIPAL OFFICE, CALCUTTA, *the 31st January 1916.*

Provident Fund Rules of the Calcutta Corporation (as sanctioned in Government Order No. 298M., dated the 27th January 1916).

1. These Rules and Regulations shall take effect as from the 1st day of February, 1916.
2 (a). "Trustees" shall, unless there is anything repugnant in the context, mean and include the Trustees of the Fund for the time being appointed as hereinafter provided.

(b). *Salary shall comprise monthly substantive salary or any allowance drawn during leave of any kind and includes acting, charge, personal or deputation allowance, if any, but shall not include local or travelling allowance.*

(c). "Manager" shall include the firm of Chartered Accountants or such other person or persons as the General Committee may, from time to time, at its uncontrolled discretion, appoint, and in whom the management of the Fund shall, subject to the general supervision and control of the Corporation, be vested. The necessary expenses of management shall be borne by, and be a charge on, the Fund.

3. Every Municipal Officer and servant [other than persons excepted by section 73, clause (c), of the Calcutta Municipal Act, 1899 (Ben. Act III of 1899), and daily labourers] in receipt of not less than Rs. 15 per mensem in the service of the Corporation on 1st January, 1902 and who is not contributing towards pension under the rules heretofore in force, and every person who shall join the service of the Corporation on or after that date in any grade higher than Rs. 10--15, or who may be admitted into a grade higher than Rs. 10--15, shall be subject to and governed by these Rules and Regulations, and every such officer or servant shall sign an agreement in the form annexed to these Rules and Regulations.

Provided always that the General Committee may, if they think fit, in their absolute discretion, at any time admit any other officer or servant to the benefits of the Fund.

Provided further that nothing in this rule shall prevent any officer or servant of the Corporation who is contributing towards pension or who is excepted under the said section 73, clause (c), from making voluntary contribution to the Provident Fund as is hereinafter provided in rule 5, clause (3).

4. There shall be five Trustees of the Provident Fund, viz., the Chairman of the Corporation and the Solicitor to the Corporation, both ex-officio, two Commissioners to be appointed annually in the month of April by the General Committee of the Corporation and one officer of the Corporation to be elected by the subscribers to the Provident Fund on or before the 15th April in each year. For the purpose of this rule the officers of the Corporation qualified to be Trustees shall be the Vice-Chairman, Engineer, Health Officer, Secretary, Assessor and Collector: Provided always that the Trustees for the time being shall continue to hold office until their successors are appointed and that the General Committee shall have power to make ad interim appointments and the subscribers to hold ad interim elections in the case of any vacancy occurring among the Trustees appointed by the General Committee or elected by the subscribers, as the case may be.

Upon every such annual or ad interim appointment or election of Trustees, all property, investments, cash and other dues belonging to and representing the Provident Fund shall be deemed to vest in the Trustees to be so appointed and elected, subject to the powers and provisions contained in these rules, or any other rules which may hereafter come into force and operation.

5. Subscriptions to the Fund shall be as follows:—

(1) *Compulsory*: A sum equal to 6½ per cent. on the amount of the salary of each subscriber shall be deducted monthly from such salary before payment of the same.

(2) *Voluntary (Class A)*.—Any subscriber may contribute by monthly instalments such further sum as he may think proper: Provided always that the total amount thus voluntarily contributed by him in any month does not exceed 6½ per cent. upon his salary for that month.

(3) *Voluntary (Class B)*.—Any officer or servant of the Corporation who is contributing towards pension or on whose behalf the Corporation makes contribution to Government for pension may also make voluntary contribution by monthly instalments to the Provident Fund not exceeding 5 per cent. upon his salary for any such month.

6. The Chairman shall, in any manner he may think most convenient, from time to time, deduct from any sum payable by the Corporation to any subscriber, whether by way of salary or otherwise, such sum as may be required to pay any subscription due from him or any arrears of subscription owing by him to the Fund, and shall, from time to time, pay over to the Manager all sums so deducted by him.

7. The compulsory subscriptions of any subscriber absent on leave or furlough shall, during the period of such absence, be assessed on the salary allowed during such absence but any such subscriber shall, if desired be at liberty to subscribe on the full amount of his salary, provided notice in writing of such desire shall have been given by him to the Chairman prior to the due date for payment of salary next after such subscriber shall have obtained leave or furlough.

8. *Voluntary subscriptions shall be paid direct to the Manager by the subscriber, or at the request of the subscriber, be deducted from the pay bill of the subscriber and remitted to the Manager. The Manager, shall forthwith credit each subscriber with the amounts of his subscriptions compulsory and voluntary, if any.*

9. For and in respect of each complete year ending with 31st day of March the Corporation shall, as soon after that date as may be practicable, contribute to the Fund a sum equal to the aggregate amount of the compulsory subscriptions for such year, and shall pay the same to the Manager.

Provided always that it shall be lawful for the Corporation, in case of the death or cessation of the service of a subscriber as hereinafter provided in rules 19 and 22 at any time before the 31st March in any financial year, to contribute to the Fund a sum equal to the aggregate amount of the compulsory subscriptions paid by such subscriber for the portion of that year.

10. The Manager shall, from time to time, pay into the Bank of Bengal at Calcutta, or any other Bank at Calcutta sanctioned by the General Committee to the credit of an account to be styled "the Corporation of Calcutta Provident Fund Account" all moneys received by the Manager after retaining only a sufficient amount to meet ordinary establishment expenses. All moneys to the credit of such account shall be dealt with only in accordance with these Rules and Regulations, and all or any portion of such moneys shall be withdrawn from such account only by cheques bearing the signatures of two Trustees in addition to the signature of the Manager.

11. All moneys not immediately required for the purposes of the Fund shall, from time to time, be invested by the Trustees at their discretion in any of the following Securities, that is to say, any of the Rupee or Sterling Securities of the Government of India, or any Securities the interest on which is or shall be guaranteed by the Government of India, or in the Bonds, Debentures or Securities of, or issued by, any

Public, Municipal or Local Body or authority in India or in the fully paid up stock or shares of any of the Presidency Banks in India, or in deposit in any Bank in Calcutta approved by the General Committee, either by way of loans on short notice or fixed for a term, with power for the Trustees, at their discretion from time to time, to vary or transpose such investments into or for others of any nature hereinbefore authorised.

12. *All investments shall be made in the name of the "the Corporation of Calcutta Provident Fund Account" and such investments or securities belonging to the Fund may be sold, negotiated, transferred, mortgaged or otherwise dealt with under the signatures of the Chairman for the time being of the Corporation and another Trustee for the time being of the said Fund.*

13. The Trustees shall, from time to time, upon the written requisition of the Manager, pay to him such sum or sums as may be required for the purposes of these Rules and Regulations, and shall, if necessary, raise the money required for the same by sale of or by raising a loan on the whole or a sufficient portion of the securities held by them, as they may think fit.

14. On the 31st day of March in each year the Manager shall credit the account of each subscriber contributing compulsory subscription with the equivalent of his compulsory subscription for the preceding year out of the Corporation contribution under rule 9 and also his share of any moneys forfeited or lapsed to the Fund in proportion to the amount standing to his credit in respect of his compulsory subscription for the year, and thereafter the Manager shall deduct the expense of management from the interest accrued on securities and on all other moneys belonging to the Fund and having ascertained the amount available for division among the subscribers (compulsory and voluntary) shall provisionally credit the account of each subscriber contributing compulsory subscription with his share thereof in proportion to the amount standing to his credit without taking into account his share of the Corporation contribution for the year as also his share of any sum forfeited or lapsed for the year, and shall also credit the account of each subscriber contributing voluntary subscription with his share thereof in proportion to the amount standing to his credit in respect of his voluntary subscription:

Provided that in the case of the cessation of the service or death of any subscriber at any time before the 31st March in any financial year it shall be lawful for the General Committee, if they think fit, to authorise the Manager to make up the account of the said subscriber before the close of the year by crediting it with a sum equal to the aggregate amount of the compulsory subscription paid by him during the portion of the said year.

15. For the purpose of proper adjustment of the account of each subscriber the value of the securities purchased prior to the 1st January, 1915, shall be deemed to be the value thereof entered in the books of the Fund on the 31st December, 1914, and the value of any securities purchased since that date shall be taken at the actual purchase price thereof, irrespective of the fluctuations in the market price thereof and in case of any sale or transfer of any securities or other dealing therewith during the year (at any profit or loss), the Manager shall (after providing for the debts and ascertained liabilities paid or incurred) credit or debit, as the case may be, the account of each subscriber with his share of such profit or loss in proportion to the amount at his credit on the 31st March.

16. A statement of account of each subscriber shall be made up to the 31st March of each year, and each subscriber shall be required to certify in writing within a month upon such account that the amount therein shown, as standing to his credit, is correct, or in default shall be precluded from challenging its correctness.

The next annual account of the Provident Fund for 1915-16 shall be made out in terms of these Rules on the 31st March, 1916 instead of on the 31st December, 1915.

17. Except as is by these Rules and Regulations expressly provided a subscriber or any person or persons acting on his behalf, in respect of his interest in the Fund, shall not be entitled to claim any payment of money to him or them.

18. Any subscriber contributing voluntary subscription may withdraw the whole or part of the voluntary subscription to his credit by written application to the Manager therefor and the Manager shall pay the same within a fortnight from the date of receiving such application.

Provided always that no subscriber shall be entitled to apply for such payment more than once in any one year unless his service in the Corporation ceases in the same year.

Provided also that such subscriber may pay back into the Fund the whole or any portion of the sum so withdrawn by twelve equal consecutive monthly instalments.

19. On the death of any subscriber the Manager shall pay to his Representatives, Executors or Administrators the amount standing to his credit in the account prepared in accordance with the provisions of rule 14.

20. On the voluntary resignation or voluntary retirement of any subscriber from the service of the Corporation or in case the services of any subscriber be dispensed with the Manager shall pay to him the aggregate amount subscribed by him to the Fund and the amount (if any) standing to his credit for interest, and if any such resignation or retirement of a subscriber takes place after a service of ten years the Manager shall pay to such subscriber a further sum equivalent to half the total amount of the Corporation contribution on account of the compulsory subscriptions of such subscriber last credited to his account, under rule 14. Provided nevertheless that the General Committee may, in their absolute discretion, direct the Manager to pay any subscriber retiring or resigning irrespective of the period of his service, the whole or such portion of the balance to the credit of such subscriber on the 31st March previous to his resignation or retirement as they may think fit, and the Manager shall forthwith pay such amount to such subscriber.

21. No subscriber shall, until he ceases altogether to be in the service of the Corporation, be entitled to the payment of the whole or any part of the Fund to his credit, save and except voluntary contribution payable to him under rule 18.

For the purposes of this rule a subscriber does not cease to be in the service of the Corporation as long as there is no break or interruption in his service, although during the continuance of such service he may hold different appointments under the Corporation for different periods or serve under different agreements for specified periods.

22. In case of any subscriber becoming permanently incapacitated owing to injury sustained whilst in the service of the Corporation, or in case of the resignation or retirement, with the previous written sanction of the authority by whom he was appointed, of any subscriber owing to illness, old age, or any other reason considered adequate by the General Committee, the Manager shall (subject to the provisions of these Rules) pay to such incapacitated, resigning or retiring subscriber, the amount standing to his credit in the account prepared in accordance with the provisions of rule 14.

23. If any subscriber shall be dismissed from the service of the Corporation or compelled to retire otherwise than by reason of illness, old age or other incapacity or the abolition of his appointment the *Manager* shall (subject to these Rules) pay to him only the aggregate amount subscribed by him to the Fund, without interest, and the balance, if any, of all moneys then standing to his credit in the books of the Fund shall (subject as aforesaid), upon such dismissal or compulsory retirement be forfeited to the use of the Fund and shall be dealt with accordingly. Provided also that the *Manager* may, at any time, with the consent of the General Committee pay to any such subscriber the amount to which he would have been entitled under rule 20 if he had voluntarily retired from the service of the Corporation and had not been dismissed.

24. The Corporation shall have a first and paramount charge upon the amount, from time to time standing to the credit of each subscriber, and upon all other moneys of the Fund in or to which he may be interested or entitled, for and in respect of all losses, damages, costs and expenses which the Corporation may at any time pay, sustain, or be put to, by reason of any act of embezzlement, or default, of or by such subscriber, and the amount from time to time standing to the credit of each subscriber, and all such other moneys as aforesaid, shall be deemed and treated as a deposit made by him with the Corporation as security for his fidelity, and be dealt with accordingly, and in the event of any claim arising by the Corporation against any subscriber under this rule the same shall be paid *unless otherwise satisfied by the subscriber*, by the *Manager* to the Corporation by and under the direction of the General Committee in that behalf out of the amount for the time being to the credit of such subscriber or other amount which may accrue to his credit thereafter and such subscriber shall absolutely forfeit all rights and interest in the amount to be so paid as aforesaid.

25. In all cases wherein a certificate shall be required of the amount of the balance standing in the books of the Fund to the credit of a deceased subscriber for any purpose, such certificate shall be in the following form :—

26. No subscriber shall be entitled to transfer or assign, whether by way of security or otherwise howsoever, his share or interest in the Fund, or any part thereof and no such transfer or assignment shall be valid, and the *Manager*, the Trustees, or the General Committee respectively shall not recognise or be bound by notice to him or them, respectively, of any such transfer or assignment.

27. It shall be lawful for the Corporation, from time to time, and at any time hereafter, *by specific resolution*, to alter, vary, modify, remake, rescind or add to these Rules and Regulations or any of them, but such alteration, variation, modification, remaking, rescission, or addition, shall not affect the rights of any employee with respect to the Fund.

Bills introduced into the Council of the Governor General for making
Laws and Regulations, or published under Rule 23.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

Delhi, the 20th January 1916.

No. 2.—The Governor General has been pleased, under Rule No. 23 of the Rules for the Conduct of the Legislative Business of the Council of the Governor General, to order the publication in the Gazette of India and in the local official Gazettes in English, of the following Bill, together with the Statement of Objects and Reasons relating thereto, and the Bill and Statement of Objects and Reasons are accordingly hereby published for general information

BILL NO. I OF 1916.

A Bill to enable Hindus and Mussalmans to make dispositions of property by transfer inter vivos or by will for the benefit of unborn persons.

WHEREAS it is expedient to enable Hindus and Mussalmans to make dispositions of property to the extent to which it is allowed in cases governed by the provisions of the Indian Succession Act, 1865 (sections 100, 101, 102 and 103) and the Transfer of Property Act, 1882 (sections 13, 14, 15 and 16); It is hereby enacted as follows:—

1. (a) This Act may be called the Hindu and Mussalman Disposition of Property Act, 1911 ;

(ii) It extends to the whole of British India.

2. In this Act, unless there is anything repugnant in the subject or Definitions. context,—

(a) "disposition of property" includes disposition by transfer *inter vivos* as well as disposition by will ;

(b) "unborn person" means, with reference to a transfer, a person not in existence at the date of the transfer, and with reference to a bequest, a person not in existence at the time of the testator's death.

3. From and after the date on which this Act shall come into force, it shall be lawful for Hindus and Mussalmans to make dispositions of property for the benefit of unborn persons, subject to the limitations hereinafter contained.

4. Where a disposition of property is made for the benefit of an unborn person subject to a prior disposition thereof, the disposition for the benefit of the unborn person shall not take effect, unless it extends to the whole of the remaining interest of the transferor or of the testator in the property.

101,
14.
5. No disposition of property can operate to create an interest which is to take effect after the lifetime of one or more persons living at the date of the transfer or of the testator's death, and the minority of some person who shall be in existence at the expiration of that period, and to whom, if he attains full age, the interest created is to belong.

103;
1882,
6. If a disposition of property is made to a class of persons, with regard to some of whom it is inoperative by reason of any of the rules con-

tained in sections 4 and 5, such disposition fails as regards the whole class.

7. Where a disposition of property fails by reason of any of the rules contained in sections 4, 5 and 6, any disposition intended to take effect after, or upon failure of, such prior disposition also fails.

8. Nothing herein contained shall affect the provisions of any enactment for the time being in force in British India and applicable to Hindus or Mussalmans.

STATEMENT OF OBJECTS AND REASONS.

THE object of the present Bill is to enable Hindus and Mussalmans to dispose of property by transfer *inter vivos* and by will for the benefit of unborn persons within certain limits. According to the Hindu Law as now administered in British India, a gift in favour of a person not in existence at the date of the gift is void: and so also a bequest in favour of a person not in existence at the time of the testator's death. The same is the rule of Mahomedan Law, except that, under the provisions of the Mussalmans Wakf Validating Act, 1913, it is competent to a Mahomedan to settle property for the benefit of unborn persons even in perpetuity, provided the ultimate disposition is for the benefit of charity.

2. Every lawyer familiar with the Indian Courts must have come across a large number of settlements and wills made by Hindus and Mahomedans for the benefit of their children and grandchildren. The paramount object of the settlor in all these cases has been to provide not only for his children and grandchildren then in existence, but also for those to be born hereafter. Instead, however, of giving effect to the settlor's intention, the law as now administered completely defeats it. Even where a donor has only one child in existence at the date of the gift, and the gift is made in express terms for the benefit of all his children including those to be born hereafter, the law excludes from the benefit of the gift all children born subsequently to the date of the gift, to the entire subversion of the donor's intention. Similarly, the intention of testators to benefit by their wills their children and grandchildren not in existence at the death of the testators is also defeated. It is to remedy these evils, and to give effect to the settlor's or testator's intention, that the present Bill is proposed. The sole object of the Bill is to enable the Court to carry out the settlor's or testator's intention, which, under the present state of the law, they are precluded from doing. At the same time, it is recognised that this can only be done within the limits allowed by the rule against perpetuity, and these limits are prescribed in clauses 4 and 5. The effect of the Bill, if passed into law, will be to enable Hindus and Mahomedans to make dispositions of their property to the same extent, and subject to the same limitations as other communities in British India.

NOTES ON CLAUSES.

Clause 4.—This clause is a reproduction of section 100 of Act X of 1865, and section 13 of Act IV of 1882.

Clause 5.—This clause is a reproduction of section 101 of Act X of 1865, and section 14 of Act IV of 1882. It refers to the rule against perpetuity.

Clause 6.—The effect of this clause is to supersede the decision in L. R. 11 I. A. 164, and other cases following it.

Clause 7.—This clause is a reproduction of section 103 of Act X of 1865, and section 15 of Act IV of 1882. It is also in conformity with the rule of construction laid down by the Privy Council in the Tagore Case.

Clause 8.—The enactments referred to in this clause are the Hindu Wills Act, 1870, the Transfer of Property Act, 1882, and the Indian Trusts Act, 1882.

PART V.

Acts of the Governor General's Council assented to by the Governor General.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

NOTIFICATION.

Delhi, the 19th January, 1916.

An Ordinance to take power to prevent the clearance for home consumption, whether from a ship or from a warehouse, of dutiable goods, the demand for which is excessive having regard to the ordinary course of such transactions, and to take power to limit or restrict the clearance or removal of salt from salt works.

WHEREAS an emergency has arisen which makes it necessary to take power to prevent the clearance for home consumption, whether from a ship or from a warehouse, of dutiable goods, the demand for which is excessive having regard to the ordinary course of such transactions, and to take power to limit or restrict the clearance or removal of salt from salt works;

Now, therefore, in exercise of the power conferred by section 72 of the Government of India Act, 1915, the Governor General is pleased to make and promulgate the following Ordinance:—

ORDINANCE NO. II OF 1916.

1. This Ordinance may be called the Dutiable Goods and Salt Ordinance, 1916.

2. All words and expressions used in section 3 of this Ordinance and defined in the Sea Customs Act, 1878, shall be deemed to have the meanings respectively attributed to them by that Act.

"Salt work" means any place where salt is kept and issued subject to the control of Government.

3. If, in the opinion of the Governor General in Council, such a course is desirable in the public interest, the Governor General in Council may, notwithstanding

standing anything to the contrary in the Sea Customs Act, 1878, or any other law for the time being in force, by order in writing, authorise Chief Customs Officers or any Chief Customs Officer to refuse to allow clearance for home consumption, whether from a ship or from a warehouse, on payment of duty of any dutiable goods, where, in the opinion of the Chief Customs Officer, the demand for clearance of such goods is excessive having regard to the ordinary course of such transactions.

4. The Governor General in Council may, in like circumstances to those referred to in section 3, and notwithstanding anything to the contrary in any Act relating to salt revenue or any other law for the time being in force, by order in writing, authorise any person having control, on behalf of Government, over salt works, to limit or restrict in such way as such person thinks fit, the clearance or removal of salt therefrom, notwithstanding that all sums due or leviable in respect of such salt have been paid.

5. No Court shall call into question any order made under this Ordinance, and no suit, prosecution or other legal proceeding shall lie against any person for anything which is in good faith done, or intended to be done, under this Ordinance or any order made thereunder.

HARDINGE OF PENSHURST,
Viceroy and Governor General.

DISTRICT REPORTS ON WEATHER AND CROPS

For the week ending on the 31st January 1916.

Summary.—The week was practically rainless. Reaping and pressing of sugarcane continue. Harvesting of spring crops is proceeding in some districts. The preparation of fields for jute and other autumn crops is in progress. The prospects of standing crops are generally reported to be fairly satisfactory. Cattle-disease is reported from four districts only. The average price of common rice for the province has fallen by about 1·3 per cent. as compared with that of the previous week.

NOTIFICATION.

No. 756A.—The 5th February 1916.—The following revised rules for the appointment of Deputy Superintendents of Police are published for general information, in supersession of the rules published under Notification No. 2489A., dated the 23rd May 1911 :—

Rules for the appointment of Deputy Superintendents of Police.

1. Deputy Superintendents of Police are recruited (a) partly by promotion from amongst Inspectors of Police and (b) partly by the direct appointment of qualified persons, including officers already in Government service in other departments, in such order as to secure that half of the total number of appointments will be held by each class.

2. Deputy Superintendents of Police are divided into four grades on Rs. 250, Rs. 300, Rs. 400 and Rs. 500 a month.

3. The promotion of Inspectors to the rank of Deputy Superintendent shall be made by Government on the recommendation of the Inspector-General. European Inspectors are eligible for promotion to the rank of Deputy Superintendent, provided they can show to the satisfaction of the Government of India that they have adopted an Indian domicile, and provided also that the number of promotions so made is strictly proportionate to the recognised European strength in the grade of Inspectors.

4(a). A candidate for direct appointment must be a statutory native of India as defined in section 6, Statute 33, Vict., Cap. 3. He must possess the following qualifications :—

(i) He must not be less than 21 or more than 25 years of age on the 31st December of the year to which the nominations relate.

(ii) He must be of good character.

(iii) He must be a graduate.

(iv) He must be of sound health and active habits and free from organic defects or bodily infirmity.

(v) He must belong to a respectable family.

(b) The selection of candidates for direct appointment will be regulated as follows :—

When a vacancy is to be filled by direct appointment, the Inspector-General of Police, with the previous sanction of Government, shall cause a notice to be published in the *Calcutta Gazette* stating the Divisions from which nominations are to be made, and the date by which applications are to reach the District Magistrates. This shall ordinarily be done in August. He shall, at the same time, ask all or any of the Commissioners of Divisions each to nominate one or more candidates by the 31st October. The Commissioner shall call on each of his district officers to submit, in consultation with the Superintendent of Police, the name of one candidate belonging to families resident or domiciled in his district from amongst the applicants.

(c) The District Magistrate, in consultation with the Superintendent of Police, shall send his recommendation to the Commissioner concerned with the following papers :—

- (i) A statement in the subjoined form (P. R. B. Form No. 1).
- (ii) A certificate from the Registrar of the University that the candidate has obtained a Degree.
- (iii) A certificate as to good character and conduct from the Principal of the Institution at which the candidate last studied for not less than a year, or from some responsible officer of Government.
- (iv) A medical certificate in original in the form required by article 49 of the Civil Service Regulations.
- (v) Evidence of the candidate's age.

(d) The Commissioner, in consultation with the Deputy Inspector-General, shall then select, out of this list, the number which he has been asked to nominate and forward the papers to the Inspector-General. On receipt of the papers, the Inspector-General may interview any of the candidates, and shall submit his recommendations to Government.

(e) The Inspector-General may, with the approval of Government, request the Director of Land Records or Commissioners of Divisions to nominate from officers already in service in other departments, *e.g.*, members of the Provincial and Subordinate Civil Services. The age of an officer nominated under this rule shall not exceed 30 years.

(f) Government will ordinarily select from the candidates thus nominated the number required to fill the appointments set aside for this class of candidates. The Governor in Council, however, reserves to himself the right to appoint, for special reasons, any person whom he may consider specially fit, even though he has not been recommended by the Inspector-General and does not possess all the qualifications mentioned in clause (a).

(g) Newly-appointed Deputy Superintendents of the above class shall undergo an eighteen months' course of instruction in the Police Training College, Surlah, as laid down in the Bengal Training College Manual, unless specially exempted by the Local Government.

5. The seniority of Deputy Superintendents will be regulated by the order of their appointment to the service. Newly-appointed Deputy Superintendents will ordinarily be placed in the lowest grade. When two or more officers are appointed on the same day, the order of their seniority will be determined by Government.

6. All Deputy Superintendents will be on probation for two years. At the end of that period, if favourably reported on, and if they have passed the prescribed examination, they will be confirmed. If a probationer fails to pass the examination within the period prescribed, or if he be unfavourably reported on, he is liable to be reverted to his original rank, or if he is an officer recruited direct, to be removed from the department. In special cases, however, Government may relax this rule on the recommendation of the Inspector-General. All officers who are confirmed will ordinarily be placed above any of their seniors who may not be found qualified for confirmation, but the penalty of supersession for delay in passing the departmental examination will ordinarily cease to operate when an officer reaches the next higher grade substantively. He will then regain his former position in the gradation list.

7. (a) Deputy Superintendents appointed direct, while at the College, will receive an allowance of Rs. 100 per mensem in lieu of their grade pay, which they will not draw until posted to a district.

(b) Officers holding substantive appointments in other departments of the Government service, who may be appointed Deputy Superintendents of Police, may be placed, at the discretion of the Local Government, in grades other than the lowest, provided that the sanctioned scale is not exceeded. Such officers will receive, while at the Training College, the pay of the grade to which they have been appointed or the pay of their substantive appointment, whichever is less, subject to a minimum of Rs. 100.

(c) When a Deputy Superintendent is appointed to a district, he will receive the full pay of his grade from the date on which he joins his district appointment.

8. The promotion of Deputy Superintendents from grade to grade will be made by Government on the recommendation of the Inspector-General of Police. Promotion to the first two grades will be made strictly

by selection and to the third grade it will ordinarily be made by seniority subject to approved service.

IRRIGATION DEPARTMENT.

The 4th January 1916.

No. 1 Notification.—The following draft of (1) revised rules and (2) revised schedule of rates of tolls, which the Governor in Council intends to make and fix, in exercise of the powers conferred by sections 6 and 11 of the Canals Act, 1864 (Bengal Act V of 1864), and in supersession of Notification No. 2, dated the 31st March 1914, for the navigable channels of the Magra Hât Drainage scheme, as defined in Notification No. 4, dated the 22nd April 1913 (published at page 634, Part I, of the *Calcutta Gazette* of the 23rd *idem*), is published as required by section 12 of that Act for the information of persons likely to be affected thereby.

II. The draft will be taken into consideration on or after the 16th February 1916, and any objection or suggestion which may be received by the undersigned before that date will be duly considered.

F. A. A. COWLEY,

Secy. to the Govt. of Bengal.

DRAFT RULES.

1. Every vessel entering or making use of the Magra Hât channels shall be liable to measurement for the purpose of ascertaining the tolls payable. In case of any reasonable doubt, the persons appointed by the Governor in Council as Collectors of Tolls or Navigation Canal Officers shall have authority to again measure a vessel notwithstanding that it was measured before.

2. Vessels for the purpose of determination of maundage shall be divided into three classes as follows:—

Class I—To include all vessels of the usual native types of build known as *saltees*, but not *bond fide* Tal (or palm tree) dongas *provided they are not used for carrying cargo*.

Class II—To include all other vessels of usual native types of build or cutters *including bholios and jolly boats*.

Class III—To include all steamers,* flats, barges, and other square-built boats.

The net maundage of every vessel, whether laden or empty, shall, for the purposes of the Canals Act, 1864, and of these rules, be determined by the following measurements:—

CLASS I.

A.—The product of one-quarter of the inside length of the vessel, measured along the centre line from stem to stern, multiplied by the interior greatest breadth of the vessel multiplied by three-quarters of the depth, measured from the top of the vessel amidships to the interior bottom of the vessel is to be taken as equal to the number of maunds upon which toll shall be levied.

B.—The measurement of the length to be made in feet, rejecting inches, and of the breadth and depth in feet and quarters of a foot, rejecting any remainder of less than a quarter of a foot.

C.—Any vessel falling under this class, the maundage of which exceeds 50 maunds according to the above method of measurement will be given the option of compounding tollage according to the rules and rates contained in Appendices A and B or paying toll per trip as laid down for vessels of Class II in Appendix B (b): the maundage of such vessels will be determined according to the measurements laid down for Class I vessels.

CLASS II.

A.—The product of one-quarter of the length of the vessel from stem to stern measured outside and along the water-line multiplied by the greatest interior breadth of the vessel multiplied by the greatest interior depth from the water-line to the interior bottom of the vessel, is to be taken as equal to the number of maunds upon which the tolls shall be levied.

* The word "steamer" includes all types of mechanically propelled craft such as motor boats.

B.—The measurement of the length is to be made in feet, rejecting inches, the measurement of the breadth and depth is to be made in feet and quarters of a foot, rejecting any remainder less than a quarter of a foot.

C.—The maundage on which the amount of toll is calculated shall be reckoned to the nearest integral multiple of $12\frac{1}{2}$ maunds, rejecting any remainder of less than $12\frac{1}{2}$ maunds. In the case of boats exceeding 500 maunds by measurement the maundage shall be reckoned to the nearest integral multiple of 50 maunds rejecting any remainder of less than 50 maunds.

D.—In the case of boats carrying passengers only, one foot shall be deducted from the full interior depth of the vessel, the other measurements and the calculations for maundage being made in the methods prescribed for vessels under Class II.

CLASS III.

A.—For vessels of class III, the number of maunds obtained by the system of measurement prescribed for vessels of class II shall be increased by one-half. For vessels of this class exceeding 1,000 maunds by measurement, the maundage shall be reckoned to the nearest integral multiple of 100 maunds rejecting any remainder of less than 100 maunds. In the case of steamers, the maundage determined as above shall be reduced by one-third as an allowance for engine space.

B.—In the case of steamers that have been surveyed under the Inland Steam-vessels Act, 1884, the registered tonnage entered in the certificate may be accepted as the tonnage of the steamer in lieu of measurement.

3. All vessels under class I, known and defined as saltees, will be charged under a system of compounded tollage in accordance with rules contained in Appendices A and B (except where exempted under Rule 2, Class I (C)).

Saltees if brought into the canals from outside for sale may be allowed to pass on payment of single tolls leviable for class II boats, provided that the owner applies to the Toll Collector for such single tickets.

Boats of class II not exceeding 100 maunds measured by canal maundage will be allowed the privilege of compounded tollage at the rates specified in Appendix A at the option of the Supervisor.

4. Every vessel included in classes II and III entering or passing along the canal shall be furnished with a ticket on paying the prescribed toll. The ticket shall specify the station at which it has been issued, the name of the person in charge of the vessel, the date on which the voyage commenced, the point to which the vessel may proceed on the line of navigation, the maundage of the vessel, the amount of toll charged, the number of days allowed for the voyage, and the date of such last day. The number of days so allowed without additional payment shall be calculated as follows:—

Boats.—One day for every eight miles or portion of eight miles, to be traversed together with one day for every 100 maunds of measurement or part of 100 maunds.

Floats (timber).—One day for every five miles for any number of timbers not exceeding 50, and one day for every additional 50 or part of 50.

Rafts (bamboos).—One day for every five miles for any number not exceeding 500 and one day for every additional 500 or part of 500.

5. Every vessel which does not complete its voyage within the number of days allowed by rule 4 shall, for each day or part of a day in excess, be liable to an extra charge equal to one-half of the toll payable on the maundage of the vessel as per Schedule of Rates in Appendix B, provided that in no case shall the demurrage charged exceed Rs. 5 per diem. The Superintending Engineer may, at his discretion, exempt any boats on any line of navigation, or any portion of line of navigation, from the payment required by this rule.

Exemption from payment of demurrage may, at the discretion of the Collector of Tolls, be granted for vessels detained in the channels (steamers broken down and boats damaged) by stress of weather, should immediate notice of detention, for the information of the Collector of Tolls, Magra Hat channels, be given to the nearest toll-station.

6. All tolls are payable on demand and shall be paid at the toll-station before a vessel is permitted to proceed: Provided that the Supervisor may, at his discretion, permit vessels belonging to individuals or firms of

recognized standing to proceed without prepayment on an undertaking that the bills for tollage due shall be liquidated monthly on presentation.

7. The ticket must be kept on board the vessel and must be produced for inspection when demanded by any person authorized to do so *and delivered on exit at the last toll-station, or at the landing station in the case of licensed salties, when the ticket expires.* If, on demand, the ticket is not produced, such person shall assess the tollage as provided in rule 2, and shall require payment of toll, and unless and until the toll is paid, or the original ticket or a duplicate is produced as evidence that toll has already been paid, the vessel will be liable to seizure and detention in accordance with the provisions of section 9 of the Canals Act, 1864.

8. Duplicates of lost tickets, of which the numbers and dates can be satisfactorily established, will be granted by the Collector of Tolls on payment of a sum of Re. 1: Provided that for tickets on which the total tollage is less than Rs. 4, the fee to be charged for a duplicate shall be one-quarter of the total tollage with a minimum of As. 4.

9. A vessel, which has been detained under these rules or under section 9 of the said Act, may not be removed from the place of detention without the order of the Collector of Tolls until the toll due has been paid. During such detention the manjhi, owner or agent must make arrangements for the safety of the vessel and cargo.

10. All vessels, whether the property of Government or of private owners, are liable for toll, except those exempted by the provisions of Bengal Government Circular No. 17, dated the 11th July 1906.

11. Vessels may be hauled up for repairs on the banks of the canals with the previous written permission of the Supervisor or Navigation Canal Officer. A rent calculated at one-sixth the rate of ordinary demurrage will be charged for the time the vessel occupies the bank.

12. At places where mooring posts have been provided by the Supervisor or Navigation Canal Officer, vessels desiring to moor shall be made fast in single line along the banks to such posts in such manner as the Supervisor or Navigation Canal Officer may direct, and shall not be moored in any other manner.

13. The Supervisor or Navigation Canal Officer may, by written notice to be posted at the toll offices, prohibit the dropping of anchors or the putting up of bamboos or *huggies* in any specified part of the canals or on the banks.

14. Vessels shall be allowed to make fast in single line along the canal banks in such manner as may be directed by the Supervisor or Navigation Canal Officer from time to time, and no boat shall be made fast to or be placed outside of boats so secured. No boat or raft shall be placed in such a position as to endanger the safety or obstruct the passage of other boats. Every vessel, when stationary, shall be securely fastened, and shall at all times have some person in attendance on board. Every vessel in motion shall have a sufficient crew.

15. Vessels passing through the canals shall keep in separate lines, empty boats keeping close to the bank, and those that are laden in the centre.

16. In portions of the canals where only one towing-path, exists, vessels shall moor on the side opposite to the towing-path, and the towing-path side shall always be kept clear.

17. Iron-built cargo-boats, with outside angle iron projecting beyond the wooden fenders, will not be allowed to enter the locks unless permanent fenders are fixed over the edges of the angle iron so as to prevent them from causing damage to the locks.

18. No fire, or open, unprotected light of any description shall be used on boats containing petroleum, jute, hay or straw in any place prohibited by the Navigation Canal Officer or Supervisor, and no fire, or open, or unprotected light (except in the case of steamers, the galley and engine room fires and the electric light) shall be used on any vessel while in a lock basin.

19. No person shall wilfully or negligently allow a vessel to sink in the canals.

20. In every case of a sunken vessel, whether due to negligence or otherwise, the Supervisor or Navigation Canal Officer and his subordinates shall offer every assistance in removing the same.

If in three days after the occurrence of a wreck it is seen that prompt measures are not being taken by the owner to remove the sunken vessel from the line of navigation, the Supervisor or Navigation Canal Officer and his subordinates shall make their own arrangements for the removal of the same at the expense of the owner, provided that, in cases where navigation is seriously obstructed, arrangements may be made at once to remove the wreck.

21. When a sunken vessel has been recovered, the Supervisor or Navigation Canal Officer shall cause notices to be posted at the locks, toll offices or other prominent places calling on those concerned to pay to the Collector of Tolls all toll or demurrage which may be due, as well as the expenses incurred in the recovery of the vessel and cargo. Should the sum due be not paid within fifteen days of the date of notice, the vessel and its furniture, or so much of it as may be necessary for the recovery of the dues, will be sold under the procedure directed in section 9 of the Canals Act, 1864.

22. The purchaser of a vessel sold under the provisions of section 9 of the said Act shall have the right to take it out of the canal on the day of purchase, or within such time as may be allowed by the Collector of Tolls, without payment of tolls.

23. When any laden vessel which has sunk has been recovered, or when any laden vessel has been seized under the provisions of the said Act or of these rules, the Supervisor or Navigation Canal Officer shall give immediate notice of the recovery or seizure to the owner of the cargo or his agent, requiring the removal of the cargo without delay and informing him that he will be required to pay all expenses necessary for the proper custody and storage of the cargo until removed.

24. If the Supervisor or Navigation Canal Officer be unable to ascertain the name and place of business or the abode of the owner of the cargo of such vessel, the notice prescribed in rule 21 shall be effected by a notice exhibited in his office and by advertisement in at least one English and one vernacular Calcutta newspaper *as well as a local newspaper*.

25. No steam-vessel, whose length exceeds thirty feet, shall ply in the Magra Hât channels except in the following:—Diamond Harbour Creek, Usti Nainan outfall, Nazra khal, Sangrampur khal up to Sangrampur bridge, and the Surjipur outer khal up to the Surjipur bridge.

26. *Lights and signals*.—Every vessel, whether travelling or moored in the Magra Hât channels, must, between sunset and sunrise, carry a white light in a lantern on her forepart where it can be distinctly seen from all sides. All steam-vessels in motion shall carry the lights prescribed by the Board of Trade Regulations. Barges or boats attached to a steam-vessel, whether in motion or moored, shall carry the light prescribed above.

27. *Speed of vessels*.—Every vessel plying in the Magra Hât channels must, between sunset and sunrise, limit her speed to three miles per hour. No steam-vessels shall ply between sunset and sunrise in channels detailed in rule 25.

28. No vessel shall remain in the outer entrance channels of the locks at Diamond Harbour and Uttarbhag nor in the inner lock channel and diversion channel of the Diamond Harbour lock and sluice, nor in the approach channels to any sluice. A board will be put up limiting the portion of the channels in which boats are not permitted to moor.

29. The places at which boats cannot be loaded or unloaded will be fixed by the Superintending Engineer, South-Western Circle, and will be demarcated with suitable posts and notice boards.

30. For any contravention of rules 10, 14, 15, 16, 17, 19, 20, 26, 27 and 28 and rule 9, *Appendix A*, the person in charge of the vessel or other person in fault shall, on conviction before a Magistrate, be liable to a fine not exceeding Rs. 50 for any one infringement, or Rs. 5 a day for any continuing infringement.

31. The channels may be closed, whenever necessary, for effecting the necessary repairs to them on one month's notice of the intention so to close them being given; but, in the event of any sudden emergency, the channels may be closed at any time without prior notice, and no claim in such cases by owners of vessels or others for compensation on account of detention or otherwise shall be entertained.

32. The term "Navigation Canal Officer," as used in these rules, shall include all persons appointed to collect tolls under section 8 of the Canals

Act, 1864, and all Public Works officers or subordinates in charge of the channel, not below the grade of Sub-Overseer.

33. No vessel whose beam exceeds 19 feet will be permitted to enter the channels through the Diamond Harbour lock. The same prohibition will apply in the case of the Uttarbhag lock to all vessels exceeding 11 feet beam.

34. Any vessel which enters the channels through the Diamond Harbour lock for the purpose of taking refuge during stormy weather will be charged a nominal toll of annas 8 per boat, provided that the vessel leaves the channel again as soon as the weather conditions permit, and does not load or unload cargo inside the channels. All vessels seeking refuge under this rule must anchor in the creek *between the Railway Station and the Toll Collector's office* and will not be permitted to proceed up the creek without paying the usual tolls.

35. Any vessel entering the channels through the Diamond Harbour lock and proceeding to load or unload at the Diamond Harbour Railway station only will be charged tollage at the rate of annas 2 per 100 maunds to include the return journey. *Five days' time will be allowed to such boats for the complete trip in and out of the lock.* Should such boats proceed up the creek, they will be charged the ordinary tolls.

The Toll Collector, Diamond Harbour, will issue a ticket when the boat enters the creek from the lock and will collect the same when the boat leaves the creek for the lock: if the quantity of cargo carried on exit exceeds that on entry he will charge tollage at the above rate on the excess amount only.

26. *The Superintending Engineer, South-Western Circle, may fix places where boats may remain for loading and unloading cargo without payment of demurrage.*

27. *Tolls will generally be levied at fixed toll-stations, but the Supervisor of the Canals may grant licenses anywhere within the canals, provided he is personally present.*

APPENDIX A.

Rules for licensing and registration of saltees or vessels under class I.

1. As provided for under rule 3, no vessel coming under class 1, rule 2, shall ply, whether regularly or only occasionally in, or partly within and partly without the limits of, the Magra Hât channels unless licensed and registered by the Collector of Tolls of the Magra Hât channels *or exempted from such registration.*

2. Every owner of a vessel or his agent or manjhi shall *present his boat* to the Collector of Tolls, Magra Hât channels, for licensing and registration giving the owner's name and residence or those of his agent duly authorized to act for him.

3. Every license granted under these rules shall continue in force for either *three, six or twelve months* from the date of issue.

4. The license is not transferable, and if the owner or manjhi or both of the vessel be changed, notice of the transfer must be given to the Collector of Tolls, the Magra Hât channels, who will endorse the change of ownership on the certificate and register free of charge.

5. The license certificate granted for a vessel shall contain the registered number of the vessel, owner's name and residence, name of *manjhi*, the maundage measurements, amount of compounded tollage and the dates of issue and expiry and shall be kept on board. It shall be produced, when required by a Navigation Canal Officer, and shall be delivered up on the expiration of the license.

6. The charge for the issue of a duplicate license to vessels in lieu of those defaced or lost shall be Re. 1.

7. The registered number of every licensed vessel shall be engraved, or branded, as well as painted in figures easily discernible on both sides of the vessel for which a charge of Re. 1 will be made. These figures shall be legibly maintained during the period of the license.

8. On the expiration of the license, the *manjhi* shall deliver up his ticket to the Toll Collector at the station from which it was issued.

9. No person in charge of any licensed vessel plying within the limits of the Magra Hât channels shall use or have any ticket resembling those granted under the authority of these rules.

10. Every renewal of a license shall, unless the Navigation Canal Officer considers it unnecessary, involve the issue of a fresh license certificate without alteration in the registered number of the vessel.

11. Every vessel under class I, found plying in the channels without being licensed and registered, shall be charged a demurrage rate of Rs. 3 for every such offence, provided that such vessel is not proceeding to the nearest toll-station for the purpose of obtaining a license and being registered. *The fine of Rs. 3 shall be in addition to the usual charge for licensing.*

Offg. Chief Secy. to the Govt. of Bengal.

NOTIFICATION.

Delhi, the 3rd February 1916.

No. 6.—The following Statutes are published for general information:—

1. Indian Civil Service (Temporary Provisions) Act, 1915—

(5 and 6 Geo. 5, Ch. 87.)

An Act to enable persons during the continuance of the War, and for a period of two years thereafter, to be appointed or admitted to the Indian Civil Service without examination.

A. D. 1915.

[The 23rd December, 1915.]

BE it enacted by the King's Most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled, and by the authority of the same, as follows:—

1.—(1) The Secretary of State in Council may, with the advice and assistance of the Civil Service Commissioners, make rules providing for the admission and appointment to the Indian Civil Service by the Secretary of State in Council, during the continuance of the present war, and for a period not exceeding two years thereafter, of British subjects possessing such qualifications with respect to age and otherwise as may be prescribed by the rules, notwithstanding that they have not been certified as being entitled for appointment as the result of examination in accordance with the regulations and rules made under section thirty-two of the Government of India Act, 1858, and section ninety-seven of the Government of India Act, 1915:

Power to appoint to Indian Civil Service without examination.

Provided that—

- (a) not less than one-fourth of the persons admitted to the Indian Civil Service during such period as aforesaid shall be persons who have been so certified as aforesaid; and

21 & 22 Vict., c. 106.
5 & 6 Geo. 5, c. 61.

(b) a person shall not be appointed to the Indian Civil Service under the rules made under this section unless the Secretary of State in Council has, with the advice and assistance of the Civil Service Commissioners, satisfied himself, in such manner as may be prescribed by the rules, that such person possesses the necessary educational qualifications.

(2) The provisions as to the laying before Parliament of regulations and rules made under the said sections thirty-two and ninety-seven shall apply to the rules made under this section.

2. This Act may be cited as the Indian Civil Service (Temporary Provisions) Act, 1915.

A. P. MUDDIMAN,
Secy. to the Govt. of India.

NOTIFICATIONS.

Simla, the 31st January 1916.

No. 140G.—It is notified for general information that travellers to French Indo-China are required to provide themselves with passports which must be visé by a French Consular Officer.

Delhi, the 3rd February 1916.

No. 425-D.—The following extract from an Order in Council dated the 30th November further amending the Defence of the Realm (Consolidation) Regulations, 1914, made by His Majesty in Council under the Defence of the Realm Consolidation Act, 1914, as subsequently amended, is published for general information.

“2. After Regulation 14B the following regulation shall be inserted :—

“14C.—(1) A person coming from or intending to proceed to any place out of the United Kingdom as a passenger shall not, without the special permission of a Secretary of State, land or embark at any port in the United Kingdom unless he has in his possession a valid passport issued to him not more than two years previously, by or on behalf of the Government of the country of which he is a subject or a citizen, or, in the case of a person coming from a place outside the United Kingdom, either such a passport or some other document satisfactorily establishing his nationality and identity.

“To every such passport and document as aforesaid there must be attached a photograph of the person to whom it relates.

“In the case of British subjects resident in Ireland special permission to embark may be given by the Lord Lieutenant of Ireland instead of by a Secretary of State.

“(2) If any person lands or embarks in contravention of this regulation, or if, where any such special permission to land has been granted by a Secretary of State subject to any conditions, the person to whom it was granted fails to comply with any such condition, he shall be guilty of a summary offence against these regulations.

“(3) For the purposes of this regulation the expression ‘passenger’ includes any person carried on a ship other than the master and persons employed in the work or service of the ship.”

JUDICIAL.

No. 135.—In pursuance of section 2 of the Defence of India (Criminal Law Amendment) Act, 1915 (IV of 1915), the Governor General in Council is

pleased to direct that the following amendment shall be made in the Defence of India (Consolidation) Rules, 1915, namely:—

After rule 25 of the said rules, the following rules shall be inserted, namely:—

“25A. (1) No person shall, without lawful excuse, collect, record, publish or communicate, or attempt to elicit, any information with respect to the movements, numbers, description, condition or disposition of any of the forces, ships or war materials of His Majesty or any of His Majesty's Allies or with respect to the plans or conduct, or supposed plans or conduct of any naval or military operations by any such forces or ships, or with respect to any works or measures undertaken for, or connected with, or intended for, the fortification or defence of any place, or any information of such a nature as is calculated to be or might be, directly or indirectly, useful to the enemy; and no person shall, without such excuse, have in his possession any document containing any such information.

(2) Whoever contravenes any of the provisions of this rule shall be punishable with imprisonment which may extend to seven years, or with fine or with both.

(3) Whoever, with the intention of assisting the King's enemies, has, since the commencement of the present war, done any of the acts referred to in sub-rule (1) shall be punishable with death, transportation for life, or imprisonment which may extend to ten years.

25 B. (1) The expression ‘spy’ in this rule includes any person who has, since the commencement of the present war, done or attempted to do any of the acts referred to in rule 25A (1) and who is reasonably suspected of having done so with the intention of assisting the King's enemies, and any person out of British India who is, or who is reasonably suspected of being, a person to whom information has been communicated or attempted to be communicated in contravention of that rule.

(2) Whoever, without lawful excuse, communicates, or attempts to communicate with a spy, shall, unless he proves that he did not know, and had no reason to suspect, that the person with whom he so communicated or attempted to communicate was a spy, be punishable with imprisonment which may extend to seven years, or with fine or with both.

(3) Whoever, with the intention of assisting the King's enemies has been, since the commencement of the present war, in communication with, or has attempted to communicate with a spy, shall be punishable with death, transportation for life, or imprisonment which may extend to ten years.

(4) A person may, unless he proves the contrary, be deemed to be in communication with a spy if the name or address or any other information regarding a spy is supplied by him to any other person, in such circumstances as to give reasonable ground for suspecting that he is in communication with the spy.

(5) Any address, whether within or without British India, reasonably suspected of being an address used for the receipt of communications intended for the King's enemies, may be deemed to be the address of a spy, and communications addressed to that address to be communications with a spy.”

NOTICE is hereby given that the undermentioned plots of land, no longer required by Government, situated along the Bengal Nagpur Railway, in the district of Midnapore, will be put up to sale at one o'clock on Monday, the 27th March 1916, corresponding with the 14th Chaitra 1322 B.S., at Paschimkola :—

The purchasers of the several plots of land will be subject to the following conditions :—

1st.—The purchasers will have no power to make any excavations on the land nearer than 15 feet from the railway boundary, or to plough the land nearer than 3 feet from the same.

2nd.—If the amount of purchase-money does not exceed Rs. 100, the whole amount must be paid down at once.

3rd.—If the amount of purchase-money exceed Rs. 100, one-fourth of the amount must be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale shall be cancelled, the sum deposited being forfeited to Government and the lot again put up for sale at the risk of the defaulting purchaser after issue of advertisement, as in the case of original sale.

4th.—The plots of land will be sold revenue-free to the highest bidders subject to upset prices.

5th.—The sale will become final on receipt by the Collector of the orders of the Commissioner confirming it, and a regular conveyance will then be granted to the purchaser.

THE Bengal and Madras Service Family Pension Fund which is provisionally managed and assisted by Government has for its object the provision of monthly pensions for the maintenance of the widows and children of subscribers and is open, with certain exceptions, to all active and pensioned members of the Uncovenanted Service of Government (except those serving under the Government of Bombay), and to Local Fund servants earning pensions from Government. Some of the special features of the Fund are—(1) that widowed daughters incapable of remarriage or children labouring under such mental or bodily infirmities as incapacitate them from earning their livelihood or preclude the possibility of marriage (in case of a daughter) are admitted to its benefits; and (2) that subscribers to the Widows' and Daughters' branches are entitled to a refund of 30 per cent. of the premia paid, should the nominees predecease them after five years of admission. The Fund is now of ten years' standing and has a balance of over three and-a-half lakhs with Government on four per cent. interest. For forms of applications and rules of the Fund apply to the Comptroller, India Treasuries Imperial Secretariat Buildings, Calcutta.

THE INDIAN LAW REPORTS.

Published in FOUR SERIES viz.

CALCUTTA, MADRAS BOMBAY AND ALLAHABAD.

THE Indian Law Reports, published under the authority of the Governor-General in Council, are printed in monthly Parts, which are issued, as soon as possible after the first of each month, at Calcutta, Madras, Bombay and Allahabad, respectively.

The Reports comprise four Series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court.

The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt; and the Madras, Bombay and Allahabad Series are distributed direct from Madras, Bombay and Allahabad, respectively.

Persons desiring to subscribe for or purchase the Reports should apply to—

the Officer in charge Bengal Secretariat Book Depôt, Calcutta, or
the Superintendent, Government Press, Madras, or
the Superintendent, Government Central Press, Bombay, or
the Curator of Government Books, United Provinces of Agra and Oudh, Allahabad.

Acts of the Governor General's Council assented to by the Governor General.

GOVERNMENT OF INDIA.
LEGISLATIVE DEPARTMENT.

NOTIFICATION.

Delhi, the 26th January, 1916.

An Ordinance to provide for the trial by court-martial of foreigners for offences against the Defence of India Rules.

WHEREAS an emergency has arisen which makes it necessary to provide for the trial by court-martial of foreigners for offences against the Defence of India Rules;

Now, therefore, in exercise of the power conferred by section 72 of the Government of India Act, 1915, the Governor General is pleased to make and promulgate the following Ordinance:—

ORDINANCE NO. III OF 1916.

1. This Ordinance may be called the Foreigners
Short title. (Trial by Court-martial)
Ordinance, 1916.

2. In this Ordinance—

(a) "British subject" has the same meaning
Definitions. as in section 27 of the
British Nationality and

Status of Aliens Act, 1914:

Provided that any person who holds a certificate of naturalization as a British subject granted under any Act of the Governor General in Council for the time being in force shall, for the purposes of this Ordinance, be deemed to be a British subject.

(b) "Defence of India Rules" means any rules for the time being in force made under section 2 of the Defence of India (Criminal Law Amendment) Act, 1915.

(c) "Foreigner" means any person who is not a British subject.

3. (1) The Governor General in Council may, by order in writing, direct that a foreigner accused of anything which is an offence in virtue of the Defence of India Rules shall be tried by court-martial.

(2) An order made under sub-section (1) may be made in respect of all foreigners or any particular foreigner or any class of foreigners, and in respect of all offences against the said rules or any particular offence or any class of offences.

(3) An order made under sub-section (1) may be made in respect of, or include any foreigner so accused whether such offence was committed before or after the commencement of this Ordinance.

4. When an order under section 3 has been made in respect of, or includes any foreigner, such foreigner, when so accused, may be taken into military custody, and shall, if he is already in other custody, be handed over to military custody, and shall be proceeded against and dealt with as if he was a person subject to military law in accordance with the Army Act, 44 & 45 and as if the offence of which he is accused was an offence against military law; and may on conviction be sentenced to, and shall be liable to suffer, any punishment assigned by the Defence of India Rules for the offence of which he is found guilty.

5. The trial and all matters precedent thereto and attendant thereon shall be held and carried out in accordance with the provisions of the Army Act and the rules for the time being in force thereunder:

Provided that the Governor General in Council may, by general or special order, modify, in such way as he may direct, any of the said provisions.

LIBERALITY OF BABU GAUR NITAI SAHA SANKHANIDHI.

No. 506Medl., dated Calcutta, the 5th February 1916.

From—THE HON'BLE MR. J. DONALD, M.A., I.C.S., Secretary to the Government of Bengal, Financial (Medical) Department.

To—The Commissioner of the Dacca Division.

WITH reference to your letter No. 282J., dated the 13th January 1915, in which you report that Babu Gaur Nitai Saha Sankhanidhi, a resident of the town of Dacca, has made a donation of Rs. 25,000 towards the construction of the new Milford Hospital, Dacca, I am directed to request that you will be so good as to convey to the gentleman the thanks of Government for his liberality and public spirit.

DEPARTMENT OF AGRICULTURE, BENGAL.

Fourth Report on the Cotton Crops of Bengal, 1915-16.

(Note.—On the average of the five years ending 1913-14, the area under the Cotton Crops in Bengal represents some 0·2 per cent. of the total area under Cotton in India).

Character of the Season.—The early crop is chiefly grown in the Chittagong Hill Tracts and in the State of Hill Tippera and to a small extent in the districts of Bankura, Midnapore and Mymensingh. The late crop is grown only in Bankura and Midnapore. The weather was favourable for the early crop in the Chittagong Hill Tracts, Bankura and Mymensingh, but unfavourable in Midnapore and in the State of Hill Tippera due to drought in Midnapore and to excessive rain in Hill Tippera during the period of growth. A fair crop has been harvested for the Province. The condition of the late crop is generally reported to be favourable.

Area Sown.—The total area sown with the early crop is estimated at 85,698 acres against 88,268 acres (revised) last year and against 89,460 acres reported in the corresponding forecast of last year. The area sown with late cotton is reported to be 2,100 acres as against the same estimate of last year.

Outturn.—The estimated outturn of early cotton works out to 28,567 bales against 33,211 bales (revised) last year and against 33,821 bales reported in the corresponding period of last year. The outturn of late cotton is estimated at 1,173 bales as against the same estimate of last year.

CALCUTTA, the 7th February 1916.

DISTRICT REPORTS ON WEATHER AND CROPS

For the week ending on the 7th February 1916.

Summary.—Excepting a slight shower in Darjeeling, there was no rain throughout the Province during the week under report. The prospects of standing crops are reported to be fairly satisfactory, but rain is needed to improve their condition. Cutting and pressing of sugarcane are continuing and harvesting of spring crops is going on in places. The preparation of fields for jute and other autumn crops is proceeding. Cattle-disease is reported from three districts only. The average price of common rice for the Province has slightly fallen as compared with that of the previous week.

Health Officer to be informed.
3. The Pilot of any Pilgrim or Emigrant vessel, or any vessel which has been declared by the Master or Medical Officer to be infected with plague or rat plague, or a vessel on which more than two cases of or deaths from sleeping sickness, jigger or typhus, have occurred, shall also telegraph to the Port Health Officer, Calcutta, and shall anchor the vessel at Diamond Harbour for inspection and grant of pratique, and shall not proceed up the river in the vessel without the permission of the Health Officer. The vessel, passengers and crew and their personal effects shall be dealt with according to the rules issued under Marine Department Notification No. 126 of the 20th October 1914.

Vessels to be detained at Diamond Harbour
4. If the number of cases of, or deaths from, small-pox or cholera on board has exceeded two, the vessel must be detained at Diamond Harbour; otherwise the Pilot may take her up to Meteabruj moorings.

Cholera and small-pox.
5. Vessels with chicken-pox, measles, or scarlet fever on board may be allowed to proceed to Meteabruj under the provisions of rule 7 for suspected vessels and shall there be granted pratique.

Chicken-pox, measles, scarlet fever.

(a) But if the number of cases of these diseases exceeds ten, the Port Health Officer at Calcutta shall be informed, and the vessel shall be detained at Diamond Harbour under the procedure indicated in rule 3 and shall be dealt with as the circumstances demand.
6. The Pilot of a vessel which has, within a period of two months immediately preceding its arrival, started from, or touched en route at, a port infected with yellow fever, or communicated (except orally without contact, or by signal) with a vessel, either infected or which has left an infected port within that period, shall anchor the vessel in Kalpi Anchorage, or if the weather is unfavourable at Diamond Harbour Anchorage, not less than half a mile from land at low water, for inspection and grant of pratique and shall not proceed up in the vessel without the permission of the Health Officer. The vessel, passengers and crew and their personal effects will be dealt with according to the rules issued under Marine Department Notification No. 126 Marine, dated the 20th October 1914.

Yellow fever

7. The Pilot of a suspected vessel, including any vessel arriving from a locality infected with sleeping sickness or jigger, shall bring the vessel up to Metiabruz and shall anchor there for inspection by the Health Officer. The Master will be held responsible that no one of the passengers or crew having, or suspected to have, any infectious or contagious disease is allowed to depart before inspection, and he shall also prevent the landing of infected bedding, clothes or other personal effects which he has reasonable cause to consider likely to be infected.

(a) If, however, any vessel brought up under this rule is subsequently found to come under one of the classes specified in rules 3, 4, 5*a* and 6, the Health Officer may direct that she be taken back to Diamond Harbour.

NOTE.—When a ship has arrived from East Africa *via* Colombo and has been granted normal pratique after examination at Colombo, she shall be taken as arriving from Colombo and as such calling for no special action.

8. The Master of any suspected or infected vessel specified in rules 3, 4, 5*a*, 6 and 7*a* shall not, without the permission of the Health Officer, allow any communication, except oral, with the shore or with any vessel or boat, excepting only the Pilot boat, and in that case communication shall be limited to receiving only the Pilot, the leadsman, their servants and baggage.

9. The Health Officer, on receiving the notice under rule 2, shall arrange to examine the vessel without delay, and the Master shall give him every facility for the examination of the passengers, crew, personal effects, cargo and any part of the ship, and shall comply with all reasonable instructions given by the Health Officer.

(a) In a case of infectious disease on a vessel arriving at Metiabruz the Health Officer shall arrange for the removal of the sick person to hospital by ambulance. The Deputy Commissioner of Port Police shall arrange to afford any assistance required by the Health Officer in the removal.

Vessels lying in the Port of Calcutta.

10. On the occurrence of a case of small-pox, chicken-pox, measles, plague, cholera, yellow fever, sleeping sickness, typhus, scarlet fever or jigger, on board any vessel lying in the port, the Master or Medical Officer (if any) shall at once intimate the fact to the Health Officer by telephone and in writing. He shall hoist signals specified in rule 1, and such signal shall not be lowered until the Health Officer has visited the vessel, arranged for the removal of the patient or patients, and given permission in writing to lower the signal. The Health Officer shall arrange for disinfection to be carried out by the Port sanitary staff.

(a) If the vessel is lying alongside a wharf or in the docks, the Master shall cause information to be given to Dock Master or Superintendent of the Wharf, and shall be responsible that the sick person be isolated as much as possible and that free communication with the wharf is stopped until the Health Officer has inspected the vessel.

11. The Master of Medical Officer, if any, shall afford such true and full information as to the occurrence of the disease as the Health Officer may require, and shall carry out all reasonable orders of that officer and give such assistance as may be necessary.

12. On the occurrence of a case of one of the diseases specified in rule 10—

(a) on any inland steam-vessel, the rules* issued under sections 51 and 51A of the Inland Steam Vessels Act, 1884, for the protection of passengers in river steamers against the spread of plague and other dangerous epidemic disease by persons travelling in such steamers shall be observed;

(b) on any other vessel plying on inland water, such as country boat, flat, etc., the police shall detain the vessel or boat, and shall at once inform

* Bengal Government Notifications Nos. 16-Marine, dated 5th March 1907, 78-Marine, dated 18th July 1908, 136-Marine, dated 17th November 1908, and 103-Marine, dated 17th October 1911—*vide* Appendix C.

the Port Health Officer or Port Sanitary Inspector. If the patient has not been removed by his friends to hospital, the police will arrange for his removal. The Sanitary Inspector shall visit the vessel or boat without delay and carry out the necessary disinfection.

13. Should the Health Officer consider it necessary, the Deputy Commissioner of Port Police shall provide a guard for any infected vessel, whether she be lying at Metcabraj on arrival or in the port proper.

14. The Master of every vessel is responsible for seeing that his vessel is kept in a clean and sanitary condition. Ships' privies may be used in the stream and at the jetties, but not in the docks. When the flushing system is disarranged, provision must be made for hand-flushing (tub and tin) each time the privy is used; otherwise the privies should be kept locked and use made of over-side privies.

15. The Master of every vessel in the stream, or in the docks, is responsible for seeing that ashes and galley refuse are not allowed to accumulate or remain for more than 48 hours. Any failure of the conservancy system as affecting ships should at once be reported to the Port Health Officer.

Disposal of dead bodies.

16. If a death occurs on board any vessel before she reaches Saugor, the body shall be buried in a depth not less than 5 fathoms in such manner as to secure its sinking at once and remaining below water.

17. If a death occurs after passing Saugor, and the vessel is not likely to reach Calcutta the same day, the body shall, with the permission of the Magistrate at Diamond Harbour, be disposed of at that place. If the vessel is likely to arrive at Calcutta the same day, the Pilot shall telegraph particulars to the Port Health Officer, who in turn shall inform the police. The body shall be kept on board until the Health Officer has determined the nature of the disease and has made arrangements, through the police, if necessary, for its removal.

18. If a death occurs from any cause on board a vessel within port limits, i.e., between Budge-Budge and Cossipore, during the day, the ensign and house flag, if there is one, are to be immediately lowered half-mast and kept in such position from sunrise to sunset as long as the body remains on board; at night one red light is to be hoisted at the peak half-mast. The occurrence of death shall be reported immediately to the Port Health Officer, who shall arrange for the disposal of the body as herein provided.

19. On the occurrence of a death on a vessel the Port Health Officer should be informed immediately. If the vessel carries a medical officer that officer shall certify as to the cause of the death. If there is no medical officer, the above certificate shall be given by the Port Health Officer.

20. When the Medical Officer of the ship or the Port Health Officer is unable for any reason to give a certificate as to the cause of death, the police shall be immediately informed by the Medical Officer or the Port Health Officer, as the case may be, and asked to arrange for a post-mortem examination.

21. In the case of death due to an accident the Master of the vessel shall report the occurrence immediately to the nearest police-station.

22. A dead body shall not be removed from the vessel until the certificate prescribed in rule 19 has been granted by the officer responsible for the same.

23. The police shall be responsible for the removal of a dead body only when (a) post-mortem examination is necessary, or (b) the body is unclaimed.

Accidents.

24. On the occurrence of an accident on board a vessel, the Master, or person in charge, shall give immediate intimation to the nearest police-station. The police will arrange for the removal of the case to hospital by ambulance.

Accidents on vessels.

Cleanliness of inland craft.

25. The manjhi of every flat or cargo boat is responsible for seeing that his vessel is kept clean and that foul bilge water is not allowed to accumulate.

Cleanliness of inland craft.

APPENDIX A.

Instruction for reporting cases of infectious diseases to the Port Health Officer.

INTIMATION of the outbreak of infectious diseases on vessels lying in the port should, under the foregoing rules, ordinarily be made in office hours direct to the Health Officer (telephone No. 2650). The Port Commissioners' telephones are available for the purpose at the Harbour Masters' hulk, Garden Reach, the Pier Head, Kidderpore Docks, Tuckta Ghat, Outram Ghat, Chandpal Ghat and the dock sheds, office of the Assistant Superintendent, coal dock and jetty sheds. If the Port Health Office is closed, or the intimation is to be given out of office hours (11 A.M. to 5 P.M.), or when there is delay in getting into communication, the Health Officer's private telephone No. 1259, otherwise telephone No. 1260 or No. 1910, may be rung up.

Use of telephones.

APPENDIX C.

Rules for the protection of passengers in river steamers against the spread of plague and other dangerous epidemic disease by persons travelling in such steamers, issued by the Government of Bengal under sections 51 and 51A of the Inland Steam Vessels Act, 1884.

[Notification No. 16 Marine, dated the 5th March 1907.]

[Notification No. 78 Marine, dated the 13th July 1908.]

[Notification No. 136 Marine, dated the 17th November 1908.]

[Notification No. 103 Marine, dated the 17th October 1911.]

RULES.

1. Whenever it appears to the Magistrate of the district or the Subdivisional Magistrate, within whose jurisdiction any ghât is situated at which steamers call, that by reason of the existence of an epidemic in the neighbourhood of such ghâts, there is danger of passengers suffering from the said epidemic being taken on board a vessel, he shall, *in consultation with the Civil Surgeon of the district*, depute a medical officer to inspect and pass all the passengers embarking at the ghât in question, and no passenger may embark without being so examined and passed.

2. (1) Whenever any case of plague, small-pox, cholera or other dangerous epidemic disease occurs on board a river steamer, the Medical Officer of the steamer or, where there is no such Medical Officer, the Master or serang, shall immediately—

- (a) remove the patient together with his bedding, drinking utensils and food to a part of the deck at the extreme stern of the steamer, where he shall be segregated from the rest of the passengers by a *purdah* or awning. In the case of plague, steps should be taken immediately to get rid of any fleas that may be present in the clothing, bedding, and, if considered necessary, in the baggage of the patient, by the complete immersion in boiling water of all articles capable of affording a lodgment for fleas;
- (b) cause all excreta, vomit and urine which may have been discharged on to the deck by the patient to be cleaned away with a solution of cyllin; and
- (c) report the case to the Subdivisional or District Magistrate within whose jurisdiction the nearest ghât lies, and also to the Civil Surgeon of the district.

(2) Where such ghât is not at the head-quarters of a subdivision or district, the report mentioned in sub-clause (c) of clause (1) shall be sent by the Medical Officer of the steamer, or Master or serang, as the case may be, by the most expeditious means available, to the next head-quarters of a subdivision or district at which the steamer will touch.

(3) At any station within the Port of Calcutta the report shall be made to the Health Officer of the Port.

3. If, when the case occurs, the steamer is lying at a ghât at the head-quarters of a subdivision or district, or, otherwise, when the steamer has reached the nearest ghât which is at such head-quarters, the Master or serang shall not move the steamer therefrom until permission has been given by the District or Subdivisional Magistrate, or by the Medical Officer under rule 8.

4. (1) On receipt of the report mentioned in rule 1, the Magistrate or Civil Surgeon shall at once depute a Medical Officer to inspect and disinfect the steamer.

(2) Such Medical Officer shall visit the steamer, and if a suitable hospital is available, or if other satisfactory arrangements can be made for his treatment and segregation, shall bring the patient to land.

(3) Within the Port of Calcutta the Health Officer of the Port shall perform these duties.

5. Where no such hospital is available and no such arrangement can be made, the patient shall not be allowed to land, but the Medical Officer deputed under rule 3 shall take steps to ensure the proper segregation of the patient on the steamer and to satisfy himself that every possible precaution has been taken to prevent the spread of the disease.

6. The Medical Officer deputed under rule 3 shall in all cases cause the deck, cabins, latrines, and any other part of the steamer where the patient has been, to be thoroughly washed down with a strong solution of cyllin, and all utensils which have been used by the patient, to be disinfected.

7. (1) In case of death, the body of the patient shall be wrapped in a cloth soaked in a strong solution of cyllin and made over to his friends, or, where he is without friends, to the police, who shall arrange for its disposal.

(2) If they have not already been disinfected as directed in rule 1 (a), the clothes of the deceased (except those in his baggage), his bedding and all food in his possession shall be burnt, unless orders to the contrary are passed by the Medical Officer.

8. The Medical Officer deputed under rule 3 shall ascertain the names and addresses of all members of the party accompanying the patient, and shall report them through the Magistrate to the Magistrate of the district to which they are proceeding.

9. When the orders contained in these rules have been complied with, and the Medical Officer deputed under rule 3 is satisfied that there is no reason further to detain the steamer, he may give permission to the Master or serang to proceed on the journey.

10. The owner of every steamer shall be bound to keep on board each steamer one gallon of cyllin.

11. The patient may be permitted to land on the expiry of a period to be fixed by the Medical Officer deputed under rule 3.

12. Any person committing a breach of any of the above rules shall be punished with fine which may extend to Rs. 20.

No. 507-C.—The following regulations are published for general information :—

British Nationality and Status of Aliens (India).

REGULATIONS.

In the exercise of the powers conferred on me by the British Nationality and Status of Aliens Act, 1914 (hereinafter referred to as "the Act"), I, the Right Honourable Austen Chamberlain, one of His Majesty's principal Secretaries of State, make the following Regulations :—

FORM OF CERTIFICATE OF NATURALIZATION IN BRITISH INDIA.

1. A certificate of naturalization granted in British India shall, save as otherwise hereinafter prescribed, be in one of the following forms :—

(A) *Where the names of children are not included.*

BRITISH NATIONALITY AND STATUS OF ALIENS ACT, 1914.

Certificate of Naturalization.

Whereas *A. B.* has applied for a certificate of naturalization, alleging with respect to himself [herself] the particulars set out below, and has satisfied the Governor-General of India in Council that the conditions laid down in the abovementioned Act for the grant of a certificate of naturalization are fulfilled in the said *A. B.*'s case :

Now, therefore, in pursuance of the powers conferred on the Governor-General of India in Council by the said Act, the Governor-General of India in Council hereby grants to the said *A. B.* this certificate of naturalization,

and declares that upon taking the oath of allegiance within the time and in the manner required by the regulations made in that behalf the said *A.B.* shall, subject to the provisions of the said Act, be entitled to all political and other rights, powers, and privileges, and be subject to all obligations, duties, and liabilities to which a natural-born British subject is entitled or subject, and have to all intents and purposes the status of a natural-born British subject.

Orders by the Governor of Bengal in Council.

MUNICIPAL AND LOCAL.

NOTIFICATIONS.

No. 469M.—*The 7th February 1916.*—In exercise of the powers conferred by section 9, sub-section (2), clause (c), of the Calcutta Municipal Act, 1899, the Governor in Council is pleased to appoint Mr. J. A. Jones, who is a Commissioner of the Corporation of Calcutta, to be a member of the General Committee of the Corporation, *vice* Mr. A. C. Patterson, resigned.

No. 484M.—*The 9th February 1916.*—The following draft order which the Governor in Council proposes to make in exercise of the powers conferred by section 86 of the Bengal Municipal Act, 1884 (Bengal Act III of 1884), is published for the information of persons likely to be affected thereby.

II. The draft will be taken into consideration on the 20th March 1916, and any objection or suggestion which may be received by the undersigned through the District Magistrate and the Divisional Commissioner before that date will be duly considered.

Draft order.

In exercise of the power conferred by section 86 of the Bengal Municipal Act, 1884 (Bengal Act III of 1884), and upon the application of the Commissioners of the Budge-Budge Municipality, in the district of the 24-Parganas, made in pursuance of a resolution passed at a meeting specially convened to consider the question, the Governor in Council is pleased to sanction the levy, under section 321 of that Act, by the Commissioners of the said Municipality, of fees for the cleansing of private privies and cess-pools within the areas to which the provisions of Part IX of the Act have been extended by Notification No. 2081-M., dated the 28th August 1915, published at page 258, Part I B of the *Calcutta Gazette*, dated the 1st September 1915.

No. 487M.—*The 9th February 1916.*—Whereas the Board of Trustees for the Improvement of Calcutta have selected the Maniktala Municipality, in the neighbourhood of Calcutta, as one of the areas to be used for the development, improvement and expansion of Calcutta, and for this purpose they propose to acquire lands there, to provide building-sites and open spaces for play-grounds for those who have been or will be, hereafter, obliged to remove from Calcutta in consequence of improvement schemes therein and to undertake drainage operations in the Maniktala Municipality;

And whereas it is necessary, in order to execute the above scheme, that the working sections of the Calcutta Improvement Act, 1911 (Bengal Act V of 1911), be extended to the said area;

Now, therefore, the Governor in Council is pleased, in exercise of the power conferred by clause (3) of section 1 of the said Act, to extend to the said area the following provisions of the said Act (as amended by Bengal Act III of 1915), so far as those provisions are applicable, namely:—

- | | | | | | |
|-----|---------------|------|-----|-----|---|
| (1) | Chapter | II | ... | ... | All sections. |

LAND SALE NOTICES.

Advertisement of Sale.

NOTICE is hereby given that the undermentioned plots of land, no longer required by Government, situated along the Bengal-Nagpur Railway, in the district of Midnapore, will be put up to sale at 1 o'clock on Monday, the 27th March 1916, corresponding with the 14th Chaitra 1322 B.S., at Jondra.

The purchasers of the several plots of land will be subject to the following conditions :—

- 1st.—The purchasers will have no power to make any excavations on the land nearer than fifteen feet from the railway boundary, or to plough the land nearer than three feet from the same.
- 2nd.—If the amount of purchase money does not exceed Rs. 100, the whole amount must be paid down at once.
- 3rd.—If the amount of purchase money exceed Rs. 100, one-fourth of the amount must be immediately deposited. If the balance be not paid by noon of the 15th day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale shall be cancelled, the sum deposited being forfeited to Government and the lot again put up for sale at the risk of the defaulting purchaser, after issue of advertisement, as in the case of original sale.
- 4th.—The plots of land will be sold revenue free to the highest bidders subject to upset prices.
- 5th.—The sale will become final on receipt by the Collector of the orders of the Commissioner confirming it, and a regular conveyance will then be granted to the purchaser.

THE INDIAN LAW REPORTS.

Published in FOUR SERIES viz.

CALCUTTA, MADRAS BOMBAY AND ALLAHABAD.

THE Indian Law Reports, published under the authority of the Governor-General in Council, are printed in monthly Parts, which are issued, as soon as possible after the first of each month, at Calcutta, Madras, Bombay and Allahabad, respectively.

The Reports comprise four Series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depot; and the Madras, Bombay and Allahabad Series are distributed direct from Madras, Bombay and Allahabad, respectively.

Persons desiring to subscribe for or purchase the Reports should apply to —

the Officer in charge Bengal Secretariat Book Depot, Calcutta, or
the Superintendent, Government Press, Madras, or
the Superintendent, Government Central Press, Bombay, or
the Curator of Government Books, United Provinces of Agra
and Oudh, Allahabad.

DEPARTMENT OF AGRICULTURE, BENGAL.

Third and Final Report on the Winter Rice Crop of Bengal, 1915-16.

(NOTE.—On the average of the five years ending 1913-14, the area under Winter Rice in Bengal represents some 10·8 per cent. of the total area under Rice in British India.)

Character of the Season.—In the second forecast, the season up till October was reported to be fairly satisfactory on the whole for the growth of the crop. Since then, somewhat excessive rainfall in the latter part of November caused slight damage in a few places, but did not affect the condition of the crop as a whole.

Acreage.—According to the figures furnished by the District Officers this year, the total acreage for the province is 15,105,100 acres against 15,084,300 acres last year, or an increase of 20,800 acres only.

Outturn.—From the summary of the district returns appended, it will be seen that a bumper crop has been harvested in the 24-Parganas, Khulna and Bakarganj, the percentage of outturn being 117, 123 and 120 respectively. Five other districts (viz., Howrah, Dinajpur, Jalpaiguri, Rangpur and Bogra) also report more than a normal crop. In seven districts (viz., Midnapur, Rajshahi, Pabna, Malda, Faridpur, Chittagong and Noakhali) the outturn was normal. Five districts report percentages between 82 to 92 and six districts between 60 to 78. Bankura returns as low a percentage as 42.

According to the District Officers' estimates, the Provincial outturn works out to 97 per cent. as compared with 72 per cent. of the normal last year.

On the basis of the normal yield of 12 maunds of clean grain per acre, the Provincial outturn works out to 129,176,300 cwts. against 95,751,400 cwts. last year.

APPENDIX I.

Third and Final Report on Winter Rice Crop of Bengal, 1915-16.

District.	Estimated normal area under winter rice.	Estimated area under winter rice.		Estimated outturn as a percentage of the normal yield per unit of area.		Date by which the harvesting generally commenced this year, and whether that date was early, normal or late.	REMARKS BY DISTRICT OFFICERS.
		Last year (1914-15).	This year (1915-16).	Last year.	This year.		
1	2	3	4	5	6	7	8
	Acres.	Acres.	Acres.				
24-Parganas ...	894,700	785,100	789,300	87	117	Middle of November. Normal.	The increase over last year's area is due to the fact that transplantation continued even after the submission of the first forecast as there was sufficient rainfall. Favourable weather also prevailed during the growth of the crop. Hence the outturn is above the normal.
Nadia ...	136,800	134,800	123,900	58	67	Ditto	The decrease in area as compared with that of the last year is due to want of rainfall. In the second forecast the area was estimated a little higher by the Subdivisional Officer of Uludaanga. The weather was not favourable. Hence the outturn is below the normal.
Murshidabad ...	345,800	315,900	322,300	75	75	November to December. Normal.	The increase in area as compared with that of the last year is due to some pure fields being cultivated with this crop in consequence of the fall in the price of jute. The weather conditions were not favourable. About 3 annas of the crop has been damaged by drought and insect-pests. Hence the outturn has fallen below the normal.
Jessore ...	568,100	411,400	463,900	87	92	November. Normal.	The slight increase in area as compared with that of the second forecast is due to more correct estimates in the Sadar and Jhenidah subdivisions. The weather was favourable, but the crop was in some parts damaged by flood and insects. Hence the low outturn.
Khulna ...	745,300	718,000	749,300	89	123	November. Normal.	The increase in area as compared with that of the last year is due to the cultivation of some <i>char</i> and fallow lands. The weather was favourable. Hence the outturn exceeded the normal.
Burdwan ...	874,800	760,000	520,000	67	67	Middle of November.	The decrease in area is due to deficient rainfall at the time of sowing. The drought prevailed throughout the district during the period of growth also. Hence the outturn is much below the normal.
Birbhum ...	604,600	604,600	573,000	67	83	End of November. Normal.	The decrease in area as compared with that of the last year is due to inadequate rainfall. The weather was fairly good afterwards.
Bankura ...	540,600	481,600	171,000	83	62	5th December. Normal.	The decrease in area is due to scanty rainfall. The outturn has fallen much below the normal for the same reason.
Medinipur ...	1,379,400	1,374,900	1,556,000	67	100	End of November. Normal.	The decrease in area as compared with that of the last year is due to want of rainfall at the time of sowing. The subsequent weather conditions were good except that the rainfall in November caused slight damage to the crop. Some damage was also due to the crop by insect-pests and rain during the harvest time. The outturn is estimated to be the normal.
Hugli ...	376,700	246,400	227,900	71	82	End of November. Normal.	The decrease in area this year was due to late monsoon. The weather was afterwards favourable for the growth of the crop. The outturn is below the normal owing to insufficient rainfall at the outset.

Hovrah	125,200	104,300	111,700	87	108	Middle of November. Normal.	The increase in area as compared with that of the last year is due to the fact that more lands were cultivated with this crop owing to the fall in the price of jute. The weather was favourable. The outturn is a little above the normal.
Rajshahi	697,000	692,000	585,900	70	100	1st week of December. Normal.	The increase in area sown this year was due to extension of cultivation owing to the decrease in the price of jute last year. The weather was favourable.
Dinajpur	1,120,800	900,800	1,034,900	80	105	End of November. Normal.	The increase in area as compared with that of last year was due to timely rainfall and also to decrease in the area under jute crop. The weather was favourable. The outturn is above the normal.
Jalpaiguri	551,300	408,000	516,400	72	106	Beginning of December. Normal.	The increase in area as compared with that of last year was due to favourable rainfall at the sowing time and to the preference given to paddy over tobacco and jute crops. The weather was favourable. The outturn is above the normal.
Darjeeling	65,200	36,800	38,200	67	92	Second week of November.	The weather was favourable for the growth of the crop. The outturn is a little below the normal.
Rangpur	822,300	582,300	800,900	90	104	Middle of November. Normal.	The weather was favourable. The outturn exceeded the normal owing to timely rainfall and continued good weather.
Hogra	302,000	303,000	302,000	80	105	Beginning of December. Normal.	The outturn is above the normal owing to favourable weather.
Palna	568,000	470,000	500,000	82	100	End of November. Normal.	The increase in area as compared with that of last year was due to extension of cultivation of this crop owing to stopping of jute trade.
Malda	300,000	300,000	300,000	85	100	Into	The weather was favourable for the growth of the crop. The outturn is reported to be normal.
Dacca	633,100	597,200	592,600	80	78	Middle of November. Normal.	The decrease in area is due to the fact that many low lands in certain parts of the district were entirely washed away during the beginning of September by unusually high floods resulting from excessive rain. The weather was good at the beginning of the season; but afterwards the floods, drought and storm caused considerable damage to the crop. In the high lands in certain parts of the district there has been a bumper crop; but the average outturn is below the normal.
Mymensingh	1,126,700	966,300	972,700	100	90	Beginning of December. Normal.	The increase over last year's area is due to the transplantation of this crop after the harvesting of jute. The weather was favourable. Subdivisional Officer of Kisho gang reports that about 40 per cent. of the broadcasted paddy was damaged by flood. Hence the low outturn.
Faridpur	770,100	641,000	768,100	80	100	Middle of November. Normal.	The increase in area was due to the fall in the price of jute last year. The weather was favourable. Slight damage was caused by the unusual rise of water. The outturn is reported to be normal.
Bakarganj	1,200,000	1,245,000	1,210,000	80	120	December. Normal.	Owing to favourable weather throughout the season, a bumper crop has been obtained.
Chittagong	418,400	425,000	426,100	80	100	End of November. Normal.	The increase in area over last year was due to extension of cultivation. The weather was favourable. The outturn is reported to be normal.

Tippura ...	734,800	820,000	783,000	75	60	November to December. Normal.	The outturn is low owing to high floods from June to September causing much damage to long-stalked paddy on low land and also to late subsidence of the same causing too much delay in transplantation. More rain in November would have benefited the late sown and late transplanted paddy greatly.
Noakhali ...	366,900	633,000	637,000	80	100	November. Normal.	The effect of the late rains in October was beneficial to the growth of the crop except in the flooded tracts in the Feni subdivision, where the outturn was poor. Still the outturn is normal on the whole.
Chittagong Hill Tracts.	47,500	78,000	48,000	50	60	1st part of December. Normal.	The increase in area over last year was due to extension of cultivation. Some damage was caused by insect-pests. In consequence of unreasonable rainfall, the outturn is below the normal.

DISTRICT REPORTS ON WEATHER AND CROPS

For the week ending on the 14th February 1916.

Summary.—No rain fell during the week under report, excepting some slight cattered showers in parts of the Rajshahi Division. Rain is urgently needed for ploughing operations for autumn crops. Reaping and pressing of sugarcane and harvesting of potatoes and pulses are in progress. The standing spring crops have suffered to some extent owing to the continued absence of rainfall. The present prospects are reported to be fair. Cattle-disease is reported from six districts. The average price of common rice for the province fell by about 1·3 per cent. as compared with that of the previous week.

NOTE.—The total approximate Earnings for the current half-year up to the end of January show an increase over the corresponding period of last year by Rs. 56,175. This increase is partly made up of Passenger Traffic and Luggage, owing to the Poojah holidays having been later in 1915 (and so throwing the traffic into the first month of the current half-year) and partly to an increase in goods traffic under Potatoes and building materials. Judging from the present state of the traffic and the absence of Tourists, it may be taken that the Gross Earnings of February and March will be only slightly better than in 1915 and may be placed at Rs. 1,75,000, making the total gross Earnings of the half year about Rs. 5,70,000.

The current week's return of Rs. 111 per mile per week is the highest yet touched and is due to a large traffic in Oranges and in Wool and to a steady but gradual development of Inwards traffic in General Stores. Though the Orange traffic is now practically over the Wool traffic it is expected will continue and the earnings during February and March may be placed at say Rs. 90 per mile per week, or about Rs. 24,000, or say Rs. 55,000 for the Half-year.

RULES.

1. Every vessel entering or making use of the Magra Hât channels shall be liable to measurement for the purpose of ascertaining the tolls payable. In case of any reasonable doubt, the persons appointed by the Governor in Council as Collectors of Tolls or Navigation Canal Officers shall have authority to again measure a vessel notwithstanding that it was measured before.

2. Vessels for the purpose of determination of maundage shall be divided into three classes as follows :—

Class I—To include all vessels of the usual native types of build known as saltees, but not *bonâ fide* Tal (or palm tree) dongas *provided they are not used for carrying cargo*.

Class II—To include all other vessels of usual native types of build or cutters *including bholios and jolly boats*.

Class III—To include all steamers,* flats, barges, and other square-built boats.

The net maundage of every vessel, whether laden or empty, shall, for the purposes of the Canals Act, 1864, and of these rules, be determined by the following measurements :—

CLASS I.

A.—The product of one-quarter of the inside length of the vessel, measured along the centre line from stem to stern, multiplied by the interior greatest breadth of the vessel multiplied by three-quarters of the depth, measured from the top of the vessel amidships to the interior bottom of the vessel is to be taken as equal to the number of maunds upon which toll shall be levied.

B.—The measurement of the length to be made in feet, rejecting inches, and of the breadth and depth in feet and quarters of a foot, rejecting any remainder of less than a quarter of a foot.

C.—*Any vessel falling under this class, the maundage of which exceeds 50 maunds according to the above method of measurement will be given the option of compounding tollage according to the rules and rates contained in Appendices A and B or paying toll per trip as laid down for vessels of Class II in Appendix B (b) : the maundage of such vessels will be determined according to the measurements laid down for Class I vessels.*

CLASS II.

A.—The product of one-quarter of the length of the vessel from stem to stern measured outside and along the water-line multiplied by the greatest interior breadth of the vessel multiplied by the greatest interior depth from the water-line to the interior bottom of the vessel, is to be taken as equal to the number of maunds upon which the tolls shall be levied.

* The word " steamer " includes all types of mechanically propelled craft such as motor boats.

B.—The measurement of the length is to be made in feet, rejecting inches, the measurement of the breadth and depth is to be made in feet and quarters of a foot, rejecting any remainder less than a quarter of a foot.

C.—The maundage on which the amount of toll is calculated shall be reckoned to the nearest integral multiple of $12\frac{1}{2}$ maunds, rejecting any remainder of less than $12\frac{1}{2}$ maunds. In the case of boats exceeding 500 maunds by measurement the maundage shall be reckoned to the nearest integral multiple of 50 maunds rejecting any remainder of less than 50 maunds.

D.—In the case of boats carrying passengers only, one foot shall be deducted from the full interior depth of the vessel, the other measurements and the calculations for maundage being made in the methods prescribed for vessels under Class II.

CLASS III.

A.—For vessels of class III, the number of maunds obtained by the system of measurement prescribed for vessels of class II shall be increased by one-half. For vessels of this class exceeding 1,000 maunds by measurement, the maundage shall be reckoned to the nearest integral multiple of 100 maunds rejecting any remainder of less than 100 maunds. In the case of steamers, the maundage determined as above shall be reduced by one-third as an allowance for engine space.

B.—In the case of steamers that have been surveyed under the Inland Steam-vessels Act, 1884, the registered tonnage entered in the certificate may be accepted as the tonnage of the steamer in lieu of measurement.

3. All vessels under class I, known and defined as saltees, will be charged under a system of compounded tollage in accordance with rules contained in Appendices A and B (*except where exempted under Rule 2, Class I (C)*).

Saltees if brought into the canals from outside for sale may be allowed to pass on payment of single tolls leviable for class II boats, provided that the owner applies to the Toll Collector for such single tickets.

Boats of class II not exceeding 100 maunds measured by canal maundage will be allowed the privilege of compounded tollage at the rates specified in Appendix A at the option of the Supervisor.

4. Every vessel included in classes II and III entering or passing along the canal shall be furnished with a ticket on paying the prescribed toll. The ticket shall specify the station at which it has been issued, the name of the person in charge of the vessel, the date on which the voyage commenced, the point to which the vessel may proceed on the line of navigation, the maundage of the vessel, the amount of toll charged, the number of days allowed for the voyage, and the date of such last day. The number of days so allowed without additional payment shall be calculated as follows:—

Boats.—One day for every eight miles or portion of eight miles, to be traversed together with one day for every 100 maunds of measurement or part of 100 maunds.

Floats (timber).—One day for every five miles for any number of timbers not exceeding 50, and one day for every additional 50 or part of 50.

Rafts (bamboos).—One day for every five miles for any number not exceeding 500 and one day for every additional 500 or part of 500.

5. Every vessel which does not complete its voyage within the number of days allowed by rule 4 shall, for each day or part of a day in excess, be liable to an extra charge equal to one-half of the toll payable on the maundage of the vessel as per Schedule of Rates in Appendix B, provided that in no case shall the demurrage charged exceed Rs. 5 per diem. The Superintending Engineer may, at his discretion, exempt any boats on any line of navigation, or any portion of line of navigation, from the payment required by this rule.

Exemption from payment of demurrage may, at the discretion of the Collector of Tolls, be granted for vessels detained in the channels (steamers broken down and boats damaged) by stress of weather, should immediate notice of detention, for the information of the Collector of Tolls, Magra Hat channels, be given to the nearest toll-station.

6. All tolls are payable on demand and shall be paid at the toll-station before a vessel is permitted to proceed: Provided that *the Supervisor* may, at his discretion, permit vessels belonging to individuals or firms of

recognized standing to proceed without prepayment on an undertaking that the bills for tollage due shall be liquidated monthly on presentation.

7. The ticket must be kept on board the vessel and must be produced for inspection when demanded by any person authorized to do so *and delivered on exit at the last toll-station, or at the branding station in the case of licensed salters, when the ticket expires.* If, on demand, the ticket is not produced, such person shall assess the tollage as provided in rule 2, and shall require payment of toll, and unless and until the toll is paid, or the original ticket or a duplicate is produced as evidence that toll has already been paid, the vessel will be liable to seizure and detention in accordance with the provisions of section 9 of the Canals Act, 1864.

8. Duplicates of lost tickets, of which the numbers and dates can be satisfactorily established, will be granted by the Collector of Tolls on payment of a sum of Re. 1: Provided that for tickets on which the total tollage is less than Rs. 4, the fee to be charged for a duplicate shall be one-quarter of the total tollage with a minimum of As. 4.

9. A vessel, which has been detained under these rules or under section 9 of the said Act, may not be removed from the place of detention without the order of the Collector of Tolls until the toll due has been paid. During such detention the manjhi, owner or agent must make arrangements for the safety of the vessel and cargo.

10. All vessels, whether the property of Government or of private owners, are liable for toll, except those exempted by the provisions of Bengal Government Circular No. 17, dated the 11th July 1906.

11. Vessels may be hauled up for repairs on the banks of the canals with the previous written permission of the Supervisor or Navigation Canal Officer. A rent calculated at one-sixth the rate of ordinary demurrage will be charged for the time the vessel occupies the bank.

12. At places where mooring posts have been provided by the Supervisor or Navigation Canal Officer, vessels desiring to moor shall be made fast in single line along the banks to such posts in such manner as the Supervisor or Navigation Canal Officer may direct, and shall not be moored in any other manner.

13. The Supervisor or Navigation Canal Officer may, by written notice to be posted at the toll offices, prohibit the dropping of anchors or the putting up of bamboos or *luggees* in any specified part of the canals or on the banks.

14. Vessels shall be allowed to make fast in single line along the canal banks in such manner as may be directed by the Supervisor or Navigation Canal Officer from time to time, and no boat shall be made fast to or be placed outside of boats so secured. No boat or raft shall be placed in such a position as to endanger the safety or obstruct the passage of other boats. Every vessel, when stationary, shall be securely fastened, and shall at all times have some person in attendance on board. Every vessel in motion shall have a sufficient crew.

15. Vessels passing through the canals shall keep in separate lines, empty boats keeping close to the bank; and those that are laden in the centre.

16. In portions of the canals where only one towing-path, exists, vessels shall moor on the side opposite to the towing-path, and the towing-path side shall always be kept clear.

17. Iron-built cargo-boats, with outside angle iron projecting beyond the wooden fenders, will not be allowed to enter the locks unless permanent fenders are fixed over the edges of the angle iron so as to prevent them from causing damage to the locks.

18. No fire, or open, unprotected light of any description shall be used on boats containing petroleum, jute, hay or straw in any place prohibited by the Navigation Canal Officer or Supervisor, and no fire, or open, or unprotected light (except in the case of steamers, the galley and engine room fires and the electric light) shall be used on any vessel while in a lock basin.

19. No person shall wilfully or negligently allow a vessel to sink in the canals.

20. In every case of a sunken vessel, whether due to negligence or otherwise, the Supervisor or Navigation Canal Officer and his subordinates shall offer every assistance in removing the same.

If in three days after the occurrence of a wreck it is seen that prompt measures are not being taken by the owner to remove the sunken vessel from the line of navigation, the Supervisor or Navigation Canal Officer and his subordinates shall make their own arrangements for the removal of the same at the expense of the owner, provided that, in cases where navigation is seriously obstructed, arrangements may be made at once to remove the wreck.

21. When a sunken vessel has been recovered, the Supervisor or Navigation Canal Officer shall cause notices to be posted at the locks, toll offices or other prominent places calling on those concerned to pay to the Collector of Tolls all toll or demurrage which may be due, as well as the expenses incurred in the recovery of the vessel and cargo. Should the sum due be not paid within fifteen days of the date of notice, the vessel and its furniture, or so much of it as may be necessary for the recovery of the dues, will be sold under the procedure directed in section 9 of the Canals Act, 1864.

22. The purchaser of a vessel sold under the provisions of section 9 of the said Act shall have the right to take it out of the canal on the day of purchase, or within such time as may be allowed by the Collector of Tolls, without payment of tolls.

23. When any laden vessel which has sunk has been recovered, or when any laden vessel has been seized under the provisions of the said Act or of these rules, the Supervisor or Navigation Canal Officer shall give immediate notice of the recovery or seizure to the owner of the cargo or his agent, requiring the removal of the cargo without delay and informing him that he will be required to pay all expenses necessary for the proper custody and storage of the cargo until removed.

24. If the Supervisor or Navigation Canal Officer be unable to ascertain the name and place of business or the abode of the owner of the cargo of such vessel, the notice prescribed in rule 21 shall be effected by a notice exhibited in his office and by advertisement in at least one English and one vernacular Calcutta newspaper *as well as a local newspaper*.

25. No steam-vessel, whose length exceeds thirty feet, shall ply in the Magra Hât channels except in the following:—Diamond Harbour Creek, Ustī Nainan outfall, Nazra khal, Sangrampur khal up to Sangrampur bridge, and the Surjipur outer khal up to the Surjipur bridge.

26. *Lights and signals*.—Every vessel, whether travelling or moored in the Magra Hât channels, must, between sunset and sunrise, carry a white light in a lantern on her forepart where it can be distinctly seen from all sides. All steam-vessels in motion shall carry the lights prescribed by the Board of Trade Regulations. Barges or boats attached to a steam-vessel, whether in motion or moored, shall carry the light prescribed above.

27. *Speed of vessels*.—Every vessel plying in the Magra Hât channels must, between sunset and sunrise, limit her speed to three miles per hour. No steam-vessels shall ply between sunset and sunrise in channels detailed in rule 25.

28. No vessel shall remain in the outer entrance channels of the locks at Diamond Harbour and Uttarbhag nor in the inner lock channel and diversion channel of the Diamond Harbour lock and sluice, nor in the approach channels to any sluice. A board will be put up limiting the portion of the channels in which boats are not permitted to moor.

29. The places at which boats cannot be loaded or unloaded will be fixed by the Superintending Engineer, South-Western Circle, and will be demarcated with suitable posts and notice boards.

30. For any contravention of rules 10, 14, 15, 16, 17, 19, 20, 26, 27 and 28 and rule 9, Appendix A, the person in charge of the vessel or other person in fault shall, on conviction before a Magistrate, be liable to a fine not exceeding Rs. 50 for any one infringement, or Rs. 5 a day for any continuing infringement.

31. The channels may be closed, whenever necessary, for effecting the necessary repairs to them on one month's notice of the intention so to close them being given; but, in the event of any sudden emergency, the channels may be closed at any time without prior notice, and no claim in such cases by owners of vessels or others for compensation on account of detention or otherwise shall be entertained.

32. The term "Navigation Canal Officer," as used in these rules, shall include all persons appointed to collect tolls under section 8 of the Canals

Act, 1864, and all Public Works officers or subordinates in charge of the channel, not below the grade of Sub-Overseer.

33. No vessel whose beam exceeds 19 feet will be permitted to enter the channels through the Diamond Harbour lock. The same prohibition will apply in the case of the Uttarbhag lock to all vessels exceeding 14 feet beam.

34. Any vessel which enters the channels through the Diamond Harbour lock for the purpose of taking refuge during stormy weather will be charged a nominal toll of annas 8 per boat, provided that the vessel leaves the channel again as soon as the weather conditions permit, and does not load or unload cargo inside the channels. All vessels seeking refuge under this rule must anchor in the creek between the *Railway Station* and the Toll Collector's office and will not be permitted to proceed up the creek without paying the usual tolls.

35. Any vessel entering the channels through the Diamond Harbour lock and proceeding to load or unload at the Diamond Harbour Railway station only will be charged tollage at the rate of annas 2 per 100 maunds to include the return journey. *Five days' time will be allowed to such boats for the complete trip in and out of the lock.* Should such boats proceed up the creek, they will be charged the ordinary tolls.

The Toll Collector, Diamond Harbour, will issue a ticket when the boat enters the creek from the lock and will collect the same when the boat leaves the creek for the lock: if the quantity of cargo carried on exit exceeds that on entry he will charge tollage at the above rate on the excess amount only.

26. *The Superintending Engineer, South-Western Circle, may fix places where boats may remain for loading and unloading cargo without payment of demurrage.*

27. *Tolls will generally be levied at fixed toll-stations, but the Supervisor of the Canals may grant licenses anywhere within the canals, provided he is personally present.*

APPENDIX A.

Rules for licensing and registration of saltees or vessels under class I.

1. As provided for under rule 3, no vessel coming under class 1, rule 2, shall ply, whether regularly or only occasionally in, or partly within and partly without the limits of, the Magra Hât channels unless licensed and registered by the Collector of Tolls of the Magra Hât channels *or exempted from such registration.*

2. Every owner of a vessel or his agent or manjhi shall *present his boat* to the Collector of Tolls, Magra Hât channels, for licensing and registration giving the owner's name and residence or those of his agent duly authorized to act for him.

3. Every license granted under these rules shall continue in force for either *three, six or twelve months* from the date of issue.

4. The license is not transferable, and if the owner or manjhi or both of the vessel be changed, notice of the transfer must be given to the Collector of Tolls, the Magra Hât channels, who will endorse the change of ownership on the certificate and register free of charge.

5. The license certificate granted for a vessel shall contain the registered number of the vessel, owner's name and residence, name of *manjhi*, the maundage measurements, amount of compounded tollage and the dates of issue and expiry and shall be kept on board. It shall be produced, when required by a Navigation Canal Officer, and shall be delivered up on the expiration of the license.

6. The charge for the issue of a duplicate license to vessels in lieu of those defaced or lost shall be Re. 1.

7. The registered number of every licensed vessel shall be engraved, or branded, as well as painted in figures easily discernible on both sides of the vessel for which a charge of Re. 1 will be made. These figures shall be legibly maintained during the period of the license.

8. On the expiration of the license, the *manjhi* shall deliver up his ticket to the Toll Collector at the station from which it was issued.

9. No person in charge of any licensed vessel plying within the limits of the Magra Hât channels shall use or have any ticket resembling those granted under the authority of these rules.

10. Every renewal of a license shall, unless the Navigation Canal Officer considers it unnecessary, involve the issue of a fresh license certificate without alteration in the registered number of the vessel.

11. Every vessel under class I, found plying in the channels without being licensed and registered, shall be charged a demurrage rate of Rs. 3 for every such offence, provided that such vessel is not proceeding to the nearest toll-station for the purpose of obtaining a license and being registered. *The fine of Rs. 3 shall be in addition to the usual charge for licensing.*

APPENDIX B.

The 22nd February 1916.

No. 4.—Notification.—The following draft of rules which, in exercise of the powers conferred by section 90 of the Bengal Embankment Act, 1882 (Bengal Act II of 1882), and in supersession of Notification No. 108, dated the 26th February 1884 (published at pages 399-400 of the *Calcutta Gazette* of the 27th *idem*), as amended by Notification No. 11, dated the 16th November 1908, the Governor in Council intends to make for carrying out the provisions of the said Act, is published for the information of persons likely to be affected thereby.

II. The draft will be taken into consideration on or after the 25th March 1916, and any objection or suggestion which may be received by the undersigned before that date will be duly considered.

Draft Rules.

1. All estimates for works or repairs or for maintenance of public embankments which are prepared under section 7 or section 47 of the Bengal Embankment Act, 1882 (Bengal Act II of 1882), shall include the estimated cost of all petty establishment employed for watching or guarding embankments and for working sluices.

2. (1) Such estimates shall also include such charges for directing and supervising establishment and for the use of tools and plant as may be directed by the Governor in Council from time to time.

(2) The said charges shall not exceed in all 26 *per cent.* on the estimated outlay on the works or repairs, exclusive of charges for the acquisition of land or for petty establishment. The charge for supervising establishment and tools and plant shall ordinarily be a consolidated one of 10 *per cent.* on the outlay on the works (excluding land and petty establishment), but if in any particular case it is desired to make a higher charge or to reduce or remit the charge altogether, a reference must be made to Government at the time when the estimate is prepared.

3. The Collector shall, previous to submitting a report to the Commissioner under section 11, 19 or 43 of the Act, obtain the written opinion of the Superintending Engineer, which shall form part of the record of proceedings in the case.

No notices regarding new works, the estimated cost of which exceeds Rs. 2,500, shall be published under section 9 of the Act, until the estimates, specifications and plans have received the approval of the Chief Engineer.

4. No estimate referred to in section 49 of the Act shall be transmitted to the Collector, until it has been countersigned by the Superintending Engineer, who shall be responsible that the repairs proposed to be executed are necessary, that it is proposed to execute them in the proper manner and that the rates entered in the estimate are fair and reasonable.

5. The Superintending Engineer shall, on the requisition of the Collector, furnish a written opinion on any work which it is proposed to execute under the Act, causing all necessary surveys to be made.

6. Where the Collector, under the last preceding rule, requires surveys to be made, he shall either cause the estimated cost of the same to be paid to the Engineer, or procure sanction, under the ordinary rules for the disbursement of public money, to the proposed expenditure. Such deposit or sanction shall provide for the salaries and allowances of the Engineers and Surveyors intended to be employed.

7. The Superintending Engineer shall, in any enquiry under section 51 of the Act, on receiving a requisition to that effect from the Collector, give his written opinion as to the boundaries of the lands affected by such works or repairs, and the extent to which they have been benefited or affected. This opinion shall form part of the record of proceedings in the case.

8. Notwithstanding that there is no express mention in section 52 of the Act of objections preferred before the Collector to the Engineer's accounts and certificate of expenses, on the ground that certain lands are not benefited by the works or repairs as specified in such certificate, the Collector shall entertain and consider such objections. As the disposal of such objections will often depend on professional enquiries, the Collector shall ordinarily consult the Engineer and, if necessary, the Superintending Engineer, before passing orders, and the substance of the reference to the Engineer, and of his reply shall form part of the record.

If, on such objection the Collector shall come to the conclusion that any alteration should be made in the certificate which has been signed by the Engineer, under section 51, he may at any time, before making an order charging or apportioning the amount under section 58 of the Act, make such alteration as provided in section 52.

9. When it appears likely that the ordinary procedure under the Act would be attended with grave and imminent danger to life and property, and proceedings are taken by the Collector, under section 25 of the Act, or by the Engineer, under section 20, the Collector shall make an immediate report to the Commissioner, and forward a copy thereof to the Superintending Engineer. In such cases the Commissioner shall lose no time in submitting a copy of the said report, with his opinion thereon, for the orders of Government.

10. All orders passed under section 31 of the Act shall be in writing, and the applicant shall be entitled to receive a copy of the same, free of charge, on application. The Engineer shall delegate to all Public Works Subdivisional Officers the power of receiving applications, under section 31 of the Act, for temporary roadways and temporary water-courses, but no person so appointed shall pass an order for the construction of a temporary water-course, unless he has been specially authorised to do so by the Superintending Engineer. Such authority shall specify the embankments in regard to which only this power is to be exercised. In all cases where an application for a temporary water-course is made to a person appointed by the Engineer, such application shall be submitted to the Engineer for transmission to the Collector. The Engineer, in forwarding applications under this section to the Collector, shall state in writing whether, in his opinion, they can be sanctioned without endangering the safety of the embankment.

11. All Public Works Subdivisional Officers shall be authorised to open or shut sluices under general rules to be issued by the Engineer, with the approval of the Collector. A copy of all rules made under this section shall be transmitted to the Superintending Engineer.

12. Any order to remove an embankment or obstruction, or to repair damage, passed under section 79 of the Act, shall be appealable to the Court to which an appeal ordinarily lies from the decision of the Magistrate who passes the order.

13. The Engineer shall submit to Government, through the Superintending Engineer, an annual report on the state of each Schedule D embankment in his charge on the 1st of April of each year. The report shall contain the following particulars:—

- (a) the original length of the embankment;
- (b) the length as maintained during the year;
- (c) the area it protects;
- (d) the floods during the year;
- (e) how the embankment was affected by the floods of the year;
- (f) the cost of its upkeep;
- (g) whether there has been any encroachment on embankment land during the year; if in the affirmative, what steps have been taken to bring the offender to justice;
- (h) if the crest of the embankment is sufficiently high to protect the lands within from floods in the river.

14. The Engineer in charge shall submit to Government annually, through the Superintending Engineer, a report with plans shewing what embankments, if any, have been erected or added to within any tract included in a prohibitory notification issued under section 6 of the Act.

Advertisement of Sale.

NOTICE is hereby given that the undermentioned plots of land, no longer required by Government, situated along the Bengal-Nagpur Railway, in the district of Midnapore, will be put up to sale at one o'clock on Monday, the 27th March 1916, corresponding with the 14th Chaitra 1322 B.S., at Paschimkola :—

The purchasers of the several plots of land will be subject to the following conditions :—

1st.—The purchasers will have no power to make any excavations on the land nearer than 15 feet from the railway boundary, or to plough the land nearer than 3 feet from the same.

2nd.—If the amount of purchase-money does not exceed Rs. 100, the whole amount must be paid down at once.

3rd.—If the amount of purchase-money exceed Rs. 100, one-fourth of the amount must be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale shall be cancelled, the sum deposited being forfeited to Government and the lot again put up for sale at the risk of the defaulting purchaser after issue of advertisement, as in the case of original sale.

4th.—The plots of land will be sold revenue-free to the highest bidders subject to upset prices.

5th.—The sale will become final on receipt by the Collector of the orders of the Commissioner confirming it, and a regular conveyance will then be granted to the purchaser.

Advertisement of Sale.

NOTICE is hereby given that the undermentioned plots of land, no longer required by Government, situated along the Bengal-Nagpur Railway, in the district of Midnapore, will be put up to sale at 1 o'clock on Tuesday, the 29th March 1916, corresponding with the 15th Chaitra 1322 B.S., at Dokanda.

The purchasers of the several plots of land will be subject to the following conditions :—

- 1st.—The purchasers will have no power to make any excavations on the land nearer than fifteen feet from the railway boundary, or to plough the land nearer than three feet from the same.
- 2nd.—If the amount of purchase-money does not exceed Rs. 100, the whole amount must be paid down at once.
- 3rd.—If the amount of purchase-money exceed Rs. 100, one-fourth of the amount must be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale shall be cancelled, the sum deposited being forfeited to Government, and the lot again put up for sale at the risk of the defaulting purchaser, after issue of advertisement, as in the case of original sale.
- 4th.—The plots of land will be sold revenue-free to the highest bidders subject to upset prices.
- 5th.—The sale will become final on receipt by the Collector of the orders of the Commissioner confirming it, and a regular conveyance will then be granted to the purchaser.

THE INDIAN LAW REPORTS.

Published in *FOUR SERIES* viz.

(CALCUTTA, MADRAS BOMBAY AND ALLAHABAD).

THE Indian Law Reports, published under the authority of the Governor-General in Council, are printed in monthly Parts, which are issued, as soon as possible after the first of each month, at Calcutta, Madras, Bombay and Allahabad, respectively.

The Reports comprise four Series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt; and the Madras, Bombay and Allahabad Series are distributed direct from Madras, Bombay and Allahabad, respectively.

Persons desiring to subscribe for or purchase the Reports should apply to—

the Officer in charge Bengal Secretariat Book Depôt, Calcutta, or
the Superintendent, Government Press, Madras, or
the Superintendent, Government Central Press, Bombay, or
the Curator of Government Books, United Provinces of Agra and Oudh, Allahabad.

MONTHLY WEATHER AND CROP REPORT OF BENGAL FOR JANUARY 1916.

I. *Character of the season.*—During the month under review light showers fell in most of the districts of Eastern Bengal and a few districts of Western Bengal. The fall was defective everywhere excepting in Howrah and Jalpaiguri. The usual rainfall statement is appended.

II. *Progress of agricultural operations.*—The harvesting of winter rice was practically over and that of potatoes and *rabi* cereals was in progress. Cutting and pressing of sugarcane and transplantation of *boro* rice were also proceeding. Lands were being prepared for the next autumn crops.

III. *State of standing crops.*—The state of the standing spring crops was on the whole fairly satisfactory. Want of sufficient moisture in the fields, however, somewhat retarded their growth.

IV. *Prospects and probable outturn.*—The prospects of tobacco, mustard and other oilseeds were fairly good; but those of wheat were less promising.

V. *Damage to standing crops.*—No damage to standing crops was reported during the month.

VI. *Condition of agricultural stock.*—The condition of agricultural stock was fairly good. The number of districts from which cattle-disease was reported varied from two to four.

VII. *Failure of pasturage and fodder.*—There was no scarcity of fodder anywhere.

VIII. *Prices of food-grains.*—During the second fortnight of the month under review the price of common rice rose in four districts, fell in eleven and remained stationary in the rest. It varied from six seers twelve chittacks a rupee at Sirajganj to eleven seers eight chittacks at Contai.

IX. *Condition of agricultural people.*—The condition of agricultural people was fair excepting in Bankura and in parts of Dacca and Tippera districts. Relief measures were continued.

DISTRICT REPORTS ON WEATHER AND CROPS

For the week ending on the 21st February 1916.

Summary.—During the week under review light scattered showers fell in many places throughout the province. The fall has to some extent improved agricultural prospects; but more rain is needed. Reaping and pressing of sugarcane are nearing completion. Harvesting of potatoes continues, and that of mustard and other spring seeds has commenced. Mango blossoms have come out fully. The prospects so far are hopeful. Fodder is getting scarce in Bankura and Noakhali. Cattle-disease is reported from seven districts. The average price of common rice for the province has very slightly risen as compared with that of the previous week.

[Second publication.]

The 22nd February 1916.

No. 4.—Notification.—The following draft of rules which, in exercise of the powers conferred by section 90 of the Bengal Embankment Act, 1882 (Bengal Act II of 1882), and in supersession of Notification No. 108, dated the 26th February 1884 (published at pages 399-400 of the *Calcutta Gazette* of the 27th *idem*), as amended by Notification No. 11, dated the 16th November 1908, the Governor in Council intends to make for carrying out the provisions of the said Act, is published for the information of persons likely to be affected thereby.

II. The draft will be taken into consideration on or after the 25th March 1916, and any objection or suggestion which may be received by the undersigned before that date will be duly considered.

Draft Rules.

1. All estimates for works or repairs or for maintenance of public embankments which are prepared under section 7 or section 47 of the Bengal Embankment Act, 1882 (Bengal Act II of 1882), shall include the estimated cost of all petty establishment employed for watching or guarding embankments and for working sluices.*

2. (1) Such estimates shall also include such charges for directing and supervising establishment and for the use of tools and plant as may be directed by the Governor in Council from time to time.

(2) The said charges shall not exceed in all 26 *per cent.* on the estimated outlay on the works or repairs, exclusive of charges for the acquisition of land or for petty establishment. The charge for supervising establishment and tools and plant shall ordinarily be a consolidated one of 10 *per cent.* on the outlay on the works (excluding land and petty establishment), but if in any particular case it is desired to make a higher charge or to reduce or remit the charge altogether, a reference must be made to Government at the time when the estimate is prepared.

3. The Collector shall, previous to submitting a report to the Commissioner under section 11, 19 or 43 of the Act, obtain the written opinion of the Superintending Engineer, which shall form part of the record of proceedings in the case.

No notices regarding new works, the estimated cost of which exceeds Rs. 2,500, shall be published under section 9 of the Act, until the estimates, specifications and plans have received the approval of the Chief Engineer.

4. No estimate referred to in section 49 of the Act shall be transmitted to the Collector, until it has been countersigned by the Superintending Engineer, who shall be responsible that the repairs proposed to be executed are necessary, that it is proposed to execute them in the proper manner and that the rates entered in the estimate are fair and reasonable.

5. The Superintending Engineer shall, on the requisition of the Collector, furnish a written opinion on any work which it is proposed to execute under the Act, causing all necessary surveys to be made.

6. Where the Collector, under the last preceding rule, requires surveys to be made, he shall either cause the estimated cost of the same to be paid to the Engineer, or procure sanction, under the ordinary rules for the disbursement of public money, to the proposed expenditure. Such deposit or sanction shall provide for the salaries and allowances of the Engineers and Surveyors intended to be employed.

7. The Superintending Engineer shall, in any enquiry under section 51 of the Act, on receiving a requisition to that effect from the Collector, give his written opinion as to the boundaries of the lands affected by such works or repairs, and the extent to which they have been benefited or affected. This opinion shall form part of the record of proceedings in the case.

8. Notwithstanding that there is no express mention in section 52 of the Act of objections preferred before the Collector to the Engineer's accounts and certificate of expenses, on the ground that certain lands are not benefited by the works or repairs as specified in such certificate, the Collector shall entertain and consider such objections. As the disposal of

such objections will often depend on professional enquiries, the Collector shall ordinarily consult the Engineer and, if necessary, the Superintending Engineer, before passing orders, and the substance of the reference to the Engineer, and of his reply shall form part of the record.

If, on such objection the Collector shall come to the conclusion that any alteration should be made in the certificate which has been signed by the Engineer, under section 51, he may at any time, before making an order charging or apportioning the amount under section 58 of the Act, make such alteration as provided in section 52.

9. When it appears likely that the ordinary procedure under the Act would be attended with grave and imminent danger to life and property, and proceedings are taken by the Collector, under section 25 of the Act, or by the Engineer, under section 29, the Collector shall make an immediate report to the Commissioner, and forward a copy thereof to the Superintending Engineer. In such cases the Commissioner shall lose no time in submitting a copy of the said report, with his opinion thereon, for the orders of Government.

10. All orders passed under section 31 of the Act shall be in writing, and the applicant shall be entitled to receive a copy of the same, free of charge, on application. The Engineer shall delegate to all Public Works Subdivisional Officers the power of receiving applications, under section 31 of the Act, for temporary roadways and temporary water-courses, but no person so appointed shall pass an order for the construction of a temporary water-course, unless he has been specially authorised to do so by the Superintending Engineer. Such authority shall specify the embankments in regard to which only this power is to be exercised. In all cases where an application for a temporary water-course is made to a person appointed by the Engineer, such application shall be submitted to the Engineer for transmission to the Collector. The Engineer, in forwarding applications under this section to the Collector, shall state in writing whether, in his opinion, they can be sanctioned without endangering the safety of the embankment.

11. All Public Works Subdivisional Officers shall be authorised to open or shut sluices under general rules to be issued by the Engineer, with the approval of the Collector. A copy of all rules made under this section shall be transmitted to the Superintending Engineer.

12. Any order to remove an embankment or obstruction, or to repair damage, passed under section 79 of the Act, shall be appealable to the Court to which an appeal ordinarily lies from the decision of the Magistrate who passes the order.

13. The Engineer shall submit to Government, through the Superintending Engineer, an annual report on the state of each Schedule D embankment in his charge on the 1st of April of each year. The report shall contain the following particulars:—

- (a) the original length of the embankment;
- (b) the length as maintained during the year;
- (c) the area it protects;
- (d) the floods during the year;
- (e) how the embankment was affected by the floods of the year;
- (f) the cost of its upkeep;
- (g) whether there has been any encroachment on embankment land during the year; if in the affirmative, what steps have been taken to bring the offender to justice;
- (h) if the crest of the embankment is sufficiently high to protect the lands within from floods in the river.

14. The Engineer in charge shall submit to Government annually, through the Superintending Engineer, a report with plans showing what embankments, if any, have been erected or added to within any tract included in a prohibitory notification issued under section 6 of the Act.

No. 30 Marine.—Whereas by virtue of section 68A of the Inland Steam-vessels Act, 1884 (VI of 1884), the provisions of the said Act apply to motor vessels in the Presidency of Bengal, with the modifications prescribed by the Notification by the Government of India in the Department of Commerce and Industry, No. 1571-52, dated the 14th March 1914,

NOW THEREFORE, in exercise of the powers conferred by section 29 of the Inland Steam-vessels Act, 1884 (VI of 1884), and with the previous sanction of the Governor-General in Council, the Governor in Council of the Presidency of Fort William in Bengal is pleased to make the following revised rules relating to the grant of certificates of competency to engineers and engine-drivers of inland steam and motor vessels, in supersession of Notification No. 68Marine, dated the 8th July 1910, as amended by Notification No. 113Marine, dated the 11th October 1912.

F. A. A. COWLEY,
Secy. to the Govt. of Bengal.

RULES RELATING TO THE EXAMINATION OF ENGINEERS AND ENGINE-DRIVERS UNDER ACT VI OF 1884.

1. Certificates of competency will be granted to those persons who pass the requisite examinations and otherwise comply with the requisite conditions. For this purpose examiners have been appointed and arrangements have been made for holding the examinations periodically at the Ports of Calcutta and Chittagong, and at Goalundo in the Faridpur district.

2. The examinations will commence early in the forenoon, and will be continued until all the candidates whose names appear upon the list of the Port Officer, Calcutta or Chittagong, or of the Subdivisional Officer, Goalundo, on the day of examination are examined.

3. Candidates for examination must make their application in form Exn. 1, which must be filled in at the Port Office, Calcutta or Chittagong, or at the Subdivisional Office, Goalundo.

Candidates unable to write English must apply at the Port Office, Calcutta or Chittagong, or at the Subdivisional Office, Goalundo, for a copy of form Exn. 1, and the same must be filled in before the Port Officer, Calcutta or Chittagong, or Subdivisional Officer, Goalundo, before submission at the Port Office, Calcutta or Chittagong, or at the Subdivisional Office, Goalundo.

The form Exn. 1, properly filled in, together with the candidate's testimonials, must be lodged with the Port Officer, Calcutta or Chittagong, or Subdivisional Officer, Goalundo, not later than three days before the day of examination.

4. Applicants will be required to produce, in addition to the usual forms of discharge, satisfactory testimonials as to sobriety, experience, ability, and general good conduct for at least the last 12 months' service on boardship preceding the date of application to be examined, unless the Government after having investigated the matter, should see fit to reduce the time.

An applicant already possessed of a certificate and wishing to appear for one of a higher grade must produce his certificate and all the discharges and testimonials he submitted when he applied for examination in the lower grade as well as the discharges and testimonials necessary for the higher grade certificate. Should references of doubtful authenticity be submitted by candidates for examination, the examining officer may require proof from the candidate of their genuineness, or an affidavit made to that effect.

If applicants have served on shore immediately preceding their application, certificates of sobriety must be produced from their employers, or from

a respectable householder if unemployed. No candidate will be allowed to be examined unless he has served on boardship six months within the last three years preceding the date of his application to be examined.

5. As such testimonials and discharges may have to be verified before the candidates can be examined, it is desirable that these should be handed over, together with the form Exn. 1, as early as possible.

6. The testimonials of service of Foreigners and of British seamen serving in foreign vessels, which cannot be verified in the Port Office, Calcutta or Chittagong, or Sub-divisional Office, Goalundo, must be confirmed either by the Consul of the country to which the ship in which the candidate served belonged, or by some other recognized official authority of that country, or by the testimony of some credible person on the spot, having personal knowledge of the facts required to be established. The production, however, of such proofs will not of necessity be deemed sufficient. Each case must be decided on its own merits; and if the sufficiency of the proofs given appears to be at all doubtful, the point must be referred to the Government.

7. Should any doubt exist as to the age of a candidate, he will be required to produce a certificate of birth or baptism.

8. Foreigners must prove to the satisfaction of the examiners that they can speak and write the English language sufficiently well to perform the duties required of them on board a British vessel.

9. Testimonials of service must ordinarily be based on their employers' office records.

Services claimed which cannot be 'verified from the employers' office records must be authenticated by affidavits of men under whom such services have been performed as well as by an affidavit of the candidate himself.

Testimonials of service from European engineers will be accepted.

10. Candidates will be required to account for any gaps in their services with documentary evidence.

Qualifications for Certificates of Competency as Second-class Engine-drivers of Inland Steam-vessels.

11. A candidate for a certificate of competency as second-class engine-driver of an inland steam-vessel must have attained the age of twenty-one years.

12. (a) He must have served an apprenticeship of at least four years if in India, or three years if in the United Kingdom, in the making or repairing of steam-engines and one year in the engine-room of a steamer; or

(b) He must have served four years in the engine-room of a steamer at sea, or on inland waters under a certificated engineer or first-class engine-driver, one year of which service must have been as a serang or tindal; or

(c) He must have served five years in the engine-room of a steamer, one year of which service must have been as serang, tindal or principal fireman in a vessel of not less than 15 nominal horse-power under a first-class engine-driver; or

(d) He must have served two years in charge of the engines of a factory or mill under a European manager or engineer and one year as engine-room serang, tindal or principal fireman in a steamer of not less than 15 nominal horse-power.

13. He must satisfactorily pass a *viva voce* examination as to the working of marine engines and boilers and the uses of the different parts and fittings, also as to the use of brine cocks, the salinometer and blowing-off the care of boilers in salt or foul water, and the art of economical stoking and prevention of smoke.

14. He must be able, if required, to show his practical qualifications by actually working the engines of a small steamer, after fulfilling all the other tests to which he will be subjected.

Qualifications for Certificates of Competency as Second-class Engine-drivers of Inland Motor-vessels.

15. A candidate for a certificate of competency as second-class engine-driver of an inland motor-vessel must have attained the age of twenty-one years.

(a) He must have served an apprenticeship of at least three years in the making or repairing of steam and motor-engines and one year in the engine-room of a motor-vessel; or

(b) He must have served three years in the engine-room of a steamer or motor-vessel, one year of which service must have been as serang or tindal in a motor-vessel; or

(c) He must have served two years in charge of the engines of a factory or mill under a European manager or engineer as well as one year as serang or tindal in the engine-room of a motor-vessel; or

(d) He must have served as engine-driver in charge of the engines of a motor-vessel during the six months preceding the 14th March 1914 and apply for examination before the 31st March 1916; or

(e) He must have served for at least six months with a second-class engine-driver's certificate for steam-vessels or with a certificate of a higher grade in the engine-room of a motor-vessel as serang or tindal.

16. He must satisfactorily pass a *voir dire* examination as to the working of different types of marine motor-engines, the uses of their parts and fittings and especially those most liable to get out of order; also as to the different oils and gases used for power purposes in internal combustion engines, the conditions under which the several kinds of oil operate, their flash point, the danger when that is low, and meaning of the term.

17. He must be able, if required, to show his practical qualifications by actually working the engines of a small motor-vessel after fulfilling all the other tests to which he will be subjected.

Qualifications for Certificates of Competency as First-class Engine-drivers of Inland Steam-vessels.

18. A candidate for a certificate of competency as first-class engine-driver of an inland steam-vessel must have attained the age of twenty-two years.

19. (a) He must have served an apprenticeship of at least four years if in India, or three years if in the United Kingdom, in the making or repairing of steam-engines, and one year as Assistant Engineer in a steamer having engines of not less than 80 nominal horse-power whilst holding a second-class engine-driver's certificate for steam-vessels; or

(b) He must have served five years in the engine-room of a steamer at sea or on inland waters, two years of which service must have been as a serang or principal tindal of a steamer having compound surface condensing engines of not less than 30 nominal horse-power whilst holding a second-class engine-driver's certificate for steam-vessels; or

(c) He must have served one year as second driver with a second-class engine-driver's certificate for steam-vessels in charge of a watch on the main engines and boilers of a steamer having compound surface condensing engines of not less than 30 nominal horse-power; or

(d) He must have served one year with a second-class engine-driver's certificate for steam-vessels as driver in charge of the engines of a steamer having compound surface condensing engines of not less than 20 nominal horse-power; or

(e) He must have served eighteen months as serang or principal tindal with a second-class engine-driver's certificate for steam-vessels in charge of a watch on the main engines and boilers of a steamer having compound surface condensing engines of not less than 30 nominal horse-power; or

(f) He must have served three years in charge of the engines of a factory or mill under a European manager or engineer, as well as two years as assistant engineer, engine-room serang or principal tindal, of a steamer having engines of not less than 80 nominal horse-power whilst holding a second-class engine-driver's certificate for steam-vessels.

20. He must pass a *viva voce* examination similar to that required by Rule 13 for a second-class engine-driver's certificate for steam-vessels but more advanced.

21. He must also be able, if required, to show his practical qualifications by actually working the engines of a steamer after fulfilling all the other tests to which he will be subjected.

Qualifications for Certificates of Competency as First-class Engine-drivers of Inland Motor-vessels.

22. A candidate for a certificate of competency as first-class engine-driver of an inland motor-vessel must have attained the age of twenty-two years.

(a) He must have served an apprenticeship of at least three years in the making or repairing of steam and motor engines and one year as serang or principal tindal in the engine-room of a motor-vessel having engines of not less than 250 brake horse-power whilst holding a second-class engine-driver's certificate for motor-vessels; or

(b) He must have served four years in the engine-room of a steamer or motor-vessel, one year of which service must have been as serang or principal tindal in a motor-vessel having engines of not less than 250 brake horse-power whilst holding a certificate as second-class engine-driver for motor-vessels; or

(c) He must have served one year as second driver, serang or principal tindal with a second-class engine-driver's certificate for motor-vessels in charge of a watch on the main engines of a motor-vessel of not less than 250 brake horse-power; or

(d) He must have served one year with a second-class engine-driver's certificate for motor-vessels, as driver-in-charge of the engines of a motor-vessel having engines of not less than 150 brake horse-power; or

(e) He must have served three years in charge of the engines of a factory or mill under a European manager or engineer as well as one year as assistant engine-driver, engine-room serang or principal tindal of a motor-vessel having engines of not less than 250 brake horse-power, whilst holding a second-class engine-driver's certificate for motor-vessels.

23. He must pass a *viva voce* examination similar to that required by rule 16 for a second-class engine-driver's certificate for motor-vessels, but more advanced.

24. He must be able, if required, to show his practical qualifications by actually working the engines of a motor-vessel after fulfilling all the other tests.

Qualifications for Certificates of Competency as Engineers.

25. A candidate must be not less than twenty-two years of age.

(a) He must have served as an apprentice engineer for five years if in India, or four years if in the United Kingdom, and prove that during the period of his apprenticeship he has been employed on the making or repairing of steam-engines, boilers, etc.

Journeyman's time will be considered as equivalent to apprenticeship.

In addition to the apprenticeship described above, the applicant must have served two years thereafter as Assistant Engineer in a steamer having engines of not less than 80 nominal horse-power or with a first-class

engine-driver's certificate as driver-in-charge of the engines of a steamer having compound surface condensing engines of not less than 30 nominal horse-power, or

Failing the above service, he must have served four years with a first-class engine-driver's certificate, in charge of the engines of a steamer having compound surface condensing engines of not less than 30 nominal horse-power.

- (b) He must be able to give a satisfactory description of boilers, and the methods of staying them, together with the use and management of the different valves, cocks, pipes and connexions.
- (c) He must understand how to correct defects from accident, decay, etc., and the means of repairing such defects.
- (d) He must understand the use of the water-gauge, pressure gauge, barometer, thermometer and salinometer, and the principles on which they are constructed.
- (e) He must state the causes, effects and usual remedies for incrustation and corrosion.
- (f) He must be able to explain the method of testing and altering the setting of the slide valves, and method of testing the fairness of shafts and adjusting them.
- (g) He must be able to calculate the suitable working pressure for a steam-boiler of given dimensions, and the stress, per square inch, on crank and tunnel shafts when the necessary data are furnished.
- (h) He must understand the construction of, and be able to maintain in working condition, the auxiliary machinery which may be placed under his charge, viz., electric light engines (steam and oil) and dynamos, electric motors, the various types of steering engines, hydraulic and refrigerating machinery.
- (i) He must understand the construction of centrifugal bucket, and plunger pumps, and the principle on which they act.
- (j) He must be able to state how a temporary or permanent repair could be effected in case of derangement of a part of the machinery, or total breakdown.
- (k) He must write a legible hand, and have a good knowledge of arithmetic up to and including vulgar and decimal fractions and square and cube roots. He must also understand the application of these rules to questions about safety valves, coal consumption, consumption of stores, capacities of tanks, bunkers, &c.
- (l) He must be able to pass a creditable examination as to the various constructions of paddle and screw engines in general use, as to the details of the different working parts, external and internal, and the use of each part.
- (m) He must possess a creditable knowledge of the prominent facts relating to combustion, heat, steam and electricity.
- (n) He will be required to make an intelligible hand sketch, or a working drawing of some one or more of the principal parts of a steam-engine, and to mark in, without a copy, all the necessary dimensions in figures, so that the sketch or drawing could be worked from (Appendix D). Drawing boards and T-squares will be provided, but applicants will have to bring with them any drawing instruments they may require.
- (o) He must be able to state the general proportions borne by the principal parts of the machinery to each other, and to calculate the direct stress, the torsional stress, and the bending stress in round bars, and the direct stress and the bending stress in rectangular bars with given loads.
- (p) He must be able to describe different types of marine motor-engines, their working and uses of the several parts.

General Rules as to Examinations.

(Engineers.)

26. All books necessary for the use of candidates under examination will be provided and applicants will not be permitted to take into the examination-room any book, paper, document, or memoranda of any description whatever; and, subject to the provisions referred to hereafter, they will also not be allowed to work out their problems on a slate or on waste paper.

27. Candidates will be allowed in the time allotted to cancel any part of their work, and, when required, additional papers will be supplied by the examiners. These additional sheets must be attached to, and form part of, the examination papers.

28. In the event of any candidate being discovered copying from another, or affording any assistance or giving any information to another, or communicating in any way with another during the time of examination, he will be regarded as having failed in his examination, and will be turned back for three months, in the same manner as if he had failed in the practical part of the examination; and no part of the fees he may have paid for examination will be returned to him.

29. If a candidate leaves the room before answering any question which has been given to him, he cannot afterwards be permitted to answer it, but the examiners may substitute other data or another question.

30. (a) The examination of candidates for certificates of competency as engineers consists of four parts: Arithmetic, Drawing, Elementary questions and *viva voce*. When the number of marks obtained in arithmetic amounts to 28, that is, two-thirds of the maximum, the candidate passes in arithmetic.

(b) All applicants presenting themselves for examination for certificates of competency as engineers will be required to give written answers to ten questions selected from the list of elementary questions shown in Appendix B. These questions are intended to furnish a record to some extent of the candidate's knowledge at the time of his examination, and also to induce the candidates to pay more attention to their handwriting and spelling.

31. The form, Appendix A, on which these answers will be written, contains also some questions as to the experience of the applicant, to be answered by him in writing.

32. Examiners may add to their *viva voce* questions on the practical management of steam-engines and boilers any of those contained in Appendix B.

33. If at the expiration of the time allowed the candidate has worked out correctly the whole of the questions set to him, and given satisfactory answers in the *viva voce* examination, he will be declared to have passed.

34. If at the expiration of the time allowed he has not worked out the whole of the questions set to him, but if the result of the *viva voce* examination, taken in connection with the answers to such of the questions as he has worked out, is sufficient to satisfy the examiners that the applicant is competent to take charge of engines, he will be declared to have passed.

35. In other cases he will be declared to have failed.

36. A report of the examination, and the examination papers will be forwarded to the Government on the prescribed form.

37. If the candidate passes, he will receive a formal note to that effect upon which the Government will issue the certificate to the candidate, whose testimonials, etc., will be returned at the same time.

Notification of having passed will be given to successful candidates.

Fees.

38. Candidates for examination, in making their application on form Exn. 1, will be required to pay the examination fees before any step is taken, whether by inquiring into their services or testing their qualifications, etc. No part of the fee will under any circumstances be returned to them; but should it be found that their service is not sufficient to entitle

Fees to be paid by applicants for examination.

them to be examined, or that their testimonials are unsatisfactory, they will be allowed to present themselves for examination without paying any further fee, when they have fulfilled the requisite service, or are able to produce satisfactory testimonials, as the case may be.

39. The fee for examination must be paid to the Port Officer, Calcutta or Chittagong, or Subdivisional Officer, Goalundo. In any case in which a candidate offers money to any other officer, and in any place but in the Port Office, Calcutta or Chittagong, or Subdivisional Office, Goalundo, the candidate so offering money will be regarded as having committed an act of misconduct, and will be rejected and not allowed to be examined for 12 months.

40. If a candidate fails in his examinations, *no part of the fee he has paid will be returned to him.*

41. The fees are as follows :—

	Rs.
Second-class engine-drivers ...	4
First-class ditto ...	10
Engineers ...	12

Failure.

42. If the applicant fails in the *viva voce* or practical part of the examination, he may not present himself for re-examination until he can produce proofs of three months' further service afloat. If he fails in arithmetic or drawing only, he may come up again at any time. Engine-drivers may be examined *de novo* after six months' active service as serang or principal tindal or second driver if the past examination showed that they might reasonably be expected to qualify.

General.

43. Certificates of competency as engineers and first and second-class engine-drivers shall be made out and issued in the forms hereunto annexed.

44. Every certificate of competency shall be made in duplicate, and one copy shall be delivered to the person entitled to the certificate and the other shall be kept and recovered by the Port Officer of Calcutta or Chittagong, or the Subdivisional Officer, Goalundo.

APPENDIX A.

(See rule 31.)

TO ENGINEER EXAMINERS.

EXAMINERS will require all candidates to fill up the particulars noted below, and will forward the same to the Government along with the report of the examination.

The arithmetical questions for engineers and the *viva voce* examinations for all candidates will be continued as heretofore, and failure in the elementary questions will be treated as failure in arithmetic.

The numbers of the questions for each examination will be selected by the examiners, and they are not to be communicated to the candidate until his examination commences.

Port	Class for which examined
Date	Candidate's name

A. Where and how long did you serve in works at the making or at the repairing of engines, and in what capacities?

B. How long have you served in the engine-room at sea, or on inland waters and in what capacities?

C. With what descriptions of engines have you served at sea, or on inland waters—paddle, or screw, or both? What size were the engines?

D. With what description of boilers have you served at sea, or on inland waters—cylindrical, multitubular, water tube, sectional or flue boilers?

E. What engine defects have come under your notice at sea, or on inland waters, what caused these defects, and how were they remedied? Give the names of the steamers for verification.

F. What boiler defects have come under your notice, what caused these defects, and how were they remedied? Give the names of the steamers for verification.

For the questions to be answered on the following pages, see the list of Elementary Questions in Appendix B. The questions need not be written: only the answers to them.

ELEMENTARY QUESTIONS.

For the examination of Engineers for Certificates of Competency.

1. What parts of an engine are generally made of wrought iron?
2. What parts of an engine are generally made of cast iron?
3. For what parts of an engine is steel sometimes used?
4. What parts of an engine are generally made of brass or gun-metal?
5. Where is "white metal" sometimes used? On account of what property possessed by it is it adopted? What objection is there to its more general use?

6. For what parts is Muntz metal sometimes used? Is it malleable? For what properties is it valued?
7. What difference is there in the composition of cast iron, of wrought iron and of steel?
8. How can cast iron, wrought iron, and steel be distinguished from each other?
9. What are the different properties of cast iron, of wrought iron and of steel?
10. What is meant by the terms "breaking stress," "proof stress," "safe working stress"?
11. What is the cohesive strength, or breaking stress, of good ordinary wrought iron?
12. Tempering steel: how is it done, and in what order do the colours come?
13. What is case-hardening?
14. Which of the common metals or alloys can be forged, and which of them are brittle or "short"?
15. What is meant by "welding"? Which of the common metals can be welded?
16. The expansion of metals by heat: give examples of this in the engine and in the boiler.
17. In the construction of steel cylindrical marine boilers, for what parts have the plates to be worked hot? What precautionary treatment of these plates is afterwards necessary?
18. In what parts of cylindrical marine boilers is the strongest rivetting employed? In which of the shell seams is it most necessary?
19. What is "caulking," and how are seams prepared for caulking?
20. Describe the different ways of fastening the ends of the main stays of a boiler. What are the merits of, or objections to, the different plans?
21. What stress per square inch is allowed on boiler stays?
22. Describe a rivetted stay, and state where such stays are commonly used.
23. Where are thin plates to be looked for in a boiler as it wears, and how is the thinness to be detected?
24. How are boiler tubes fixed? What are "stay tubes," and how are they secured?
25. Where is it generally that boiler tubes leak? How is this defect repaired? What are the causes of this leaking?
26. What are the causes of cracked tube plates? Where are the cracks situated? How are they repaired?
27. What is the difference between a "dry uptake" and a "wet uptake"? Which requires more repair? Why? Where have you seen a wet uptake?
28. What is a superheater? What is its construction? What valves are on it? There is sometimes a gauge glass on it. What is that for? Are superheaters now in general use?
29. What parts of a marine multitubular boiler are first injured by shortness of water?
30. Where are angle irons sometimes used in the construction of a boiler, and where are flanged plates used?
31. Priming; to what causes is it attributed? What means are applied to prevent it? What evils may be produced by it?
32. Funnel draught; what makes it? What checks it?
33. Flame is sometimes seen at the top of the funnel; what causes this appearance? Is it beneficial or is it detrimental? Why so?
34. A blast pipe; what is its construction? Where is it placed? For what is it used?
35. How many bottom blow-off cocks are generally fitted to each boiler, and why are they so fitted?
36. Blow-off cocks are sometimes fitted with a spanner guard; for what purpose is this? Describe how the guard is formed.
37. Water-gauge test-cocks; where are they placed? At what heights? Must the cocks themselves be at those heights? What provision is made for cleaning these cocks should they ever become choked? When there are no test-cocks, how is the height of the water ascertained?
38. What is a dead-weight safety valve? Of what are the rubbing surfaces formed? How is a lock-up valve arranged to admit of lifting it or of turning it round, and to prevent adding to the weight?

39. About what area of safety valve is now required by the Board of Trade? What is the effect of suddenly opening a safety valve when steam is up? To about what extent do safety valves rise when blowing off without being eased by hand?

40. Spring-loaded safety valves; what advantages have they that are not possessed by dead-weight valves? What are the disadvantages, if any, as compared with dead-weight valves?

41. Of what pieces does a glass water gauge mounting consist? How does it act? Where is it placed? At what height? Is it liable to derangement? How is its working tested?

42. Glass water gauges have sometimes pipe connections top and bottom; what is the object of this arrangement? Should there be cocks at the extremities of these pipes? Why? Or why not?

43. Describe a Bourdon steam gauge. Some gauges have an inverted syphon pipe below them: what is its use?

44. Why is a small cock sometimes put on the pipe leading to a steam gauge? Where should it be placed, and what error might be made by omitting to use it?

45. Do steam gauges indicate the total pressure of the steam or only a portion of that pressure? What is the pressure measured from?

46. What is meant by the salting of the boiler? How is this prevented? What is the density of ordinary sea water? How is the density ascertained? What is the difference between the formation of scale and the salting of the boiler? What is the maximum density at which boilers should be worked at sea? In the event of condenser tubes leaking, what is the minimum density at which boilers should be worked? Give your reasons.

47. Scum cocks and pipes; how are they arranged? Where are they placed? At what height in the boiler? When are they used? When must they be shut? Neglect of these cocks leads to what dangers?

48. Of what does scale consist? Where is it most objectionable? How is it removed? How is its formation prevented? What evil effects are produced by it?

49. What is a salinometer? Of what does it consist? How does it act? How is it graduated? Can it be used at any temperature indiscriminately?

50. What harm may be done through the check valve of one of a set of boilers being defective while under way? How would you work to avoid this harm?

51. How is the leak from a split tube stopped in a boiler under way? Describe the operation.

52. What is the use of dampers? Where are they fitted? When should they be used?

53. When there are no dampers fitted, what is used instead? What evil to the boiler is sometimes attributed to this? When the heating surfaces are clean does this occur?

54. Describe the piston of a steam cylinder; with its different rings and their uses. There are generally round pieces let in flush on one side of a piston; what are they? How are these pieces fixed?

55. Cylinder drain cocks; what is their use? There is sometimes a valve upon each cock; what purpose does it serve?

56. Cylinder escape valves; of what do they consist? How protected? How regulated? When are they most needed? To what danger do they expose the engineer? What precaution is sometimes used to obviate this danger?

57. What is a compound engine? What different kinds are there for screw steamers, in respect to the number and arrangement of their cranks and cylinders? What is a triple expansion engine?

58. What is link motion? What are some of its advantages? In modern engines for the screw propeller when there is no link motion, what takes its place?

59. What is a separate expansion valve? Why is it not fitted to all engines? What effect has an expansion valve upon the starting and upon the reversing of the engine?

60. What arrangement is applied to reduce the friction of a slide valve? To what is the friction due?

61. Describe a loose eccentric; how does it act? In what engines are the loose eccentrics still employed?

62. What is the travel of the eccentric rod? How it is measured on the eccentric? What is the travel of the slide valve when the link motion is in mid gear, and the engine still moving?

63. What are "double beat valves"? What objections are there to their use?

64. What is a circulating pump? Is it always worked by the main engine? Give an example from your last steamer of the three water temperatures generally noted by careful engineers.

65. An air valve is sometimes fitted to a circulating reciprocating pump: what purpose does it serve?

66. What is the difference between a bucket air-pump, a piston air-pump, and a plunger air-pump?

67. Are double-acting air-pumps made with plungers, with pistons, or with buckets? Describe the construction and action of circulating-pumps.

68. What is an air-pump trunk? When is it necessary? How is it attached to the bucket? Centrifugal pumps: describe their construction and mode of working.

69. What class of air-pump requires both foot and delivery valves, and in what other class can either of these valves be in some cases dispensed with?

70. What are marine governors? What is their general construction? How do they act?

71. With a surface condenser and a single acting air-pump what is the effect of a leaky foot valve, and what is the effect of a leaky bucket when there is also a foot valve?

72. Where is the air-pump pet cock or valve placed? How does it act? What is its object? Does it in every case reduce the effective capacity of the pump? Is it equally applicable to double acting pumps?

73. At what temperature is the hot well worked? What is the effect of higher temperatures? What is the effect of lower temperatures? What limits the lowness of temperature? Has a very low temperature any disadvantages?

74. Bilge injection with jet condensers; what are the fittings required? When is it used? What precautions are necessary in using it?

75. When surface condensers are used, what takes the place of the bilge injection? To what is the connection made? How is its valve formed? Why is this necessary?

76. What are the practical guides to the proper amount of opening of the inlet valve for the circulating pump?

77. Feed-pump pet cock or valve; where is it placed? What is its use? How does it act? Is it always a necessary fitting?

78. What are some of the ways of fastening the ends of surface condenser tubes? About what size and about what thickness are condenser tubes? What parts of a surface condenser are made of brass?

79. What is a blow-through valve or cock? To what is it attached? There is sometimes a valve which, when opened, admits steam from the slide valve casing to the exhaust port; what is its use? To which cylinder is it fitted?

80. What are snifting valves? Why are they generally omitted now?

81. What connexions are generally fitted to the donkey pump, and to what services can it be applied?

82. When the engines are stopped in harbour with steam up, what are to be shut and what are to be opened?

83. How is an engine heated up before starting? What precautionary examinations are made before starting?

84. What is an interceptor or catch-water? Where is it fixed, what is its construction, how does it act, and what attention does it require?

85. Describe an air-pump bucket with its valve or valves and its packing. Of what are the valves generally made?

86. Of what materials are air-pump rods made? Why?

87. What is the racing of the engine? When does it occur? What danger attaches to it? What is done to prevent it?

88. When under way, when the air-pump bucket is at the top of its stroke, at what height is the water in the condenser?

89. What is meant by the "pitch" of a screw propeller? How is it measured?

90. Explain the difference between a "right hand" and a "left hand" propeller, and state how each of them revolves.

91. What is the slip of a screw propeller? How is its amount expressed in figures?

92. Which of the valves about engines and boilers have to be worked by hand, which of them are self-acting, and which are worked by the motion of the engine.

93. Why is soda sometimes put into a boiler, and how is it put in when under way? What is the kind of soda used?

94. Tallow cups for cylinders were sometimes made with two small cocks, or with only one small cock, or with one large hollow plug cock or with one small cock and a valve; which of these is suitable for a high-pressure cylinder, and which for the cylinder of a condensing engine? Describe how the cup with only one small cock is used. What is now generally used instead of these? How has this change come about?

95. Does a cylinder escape valve, self-acting allow all the water to escape? If not, how much is left in the cylinder?

96. What is a "Steam Lubricator" (sometimes called an Impermeator)? Explain its action. To what part of the engine is it connected? Will throwing cold water over it make it work faster or slower? Describe the one used in your last steamer.

97. A common paddle wheel; of what is the centre made? Of what are the arms formed? What is the form of the bolts which attach the floats to the arms? How are the arms attached to the centres?

98. Why have some paddle wheels one or more cast-iron floats in each wheel? With what engines are these most required? At what part of the circumference are they placed?

99. Why are paddle wheel floats sometimes made of different breadths in the same wheel? With what description of engine is this most needed? Where are the broad floats placed and where are the narrow floats placed in the circumference of the wheel?

100. What difference is there between a radial paddle wheel and one with feathering floats? What is the object of feathering floats? Are all the eccentric rods attached in the same way, and are they all of the same form?

101. Whereabout is the centre of the eccentric of a paddle wheel with feathering floats placed? In that case are the feathering levers on the striking face or on the back of the float? When the paddle shaft has an outer bearing, how is the eccentric made?

102. Of what materials are the working surfaces of a paddle wheel with feathering floats? How are they lubricated?

103. What is a "Disconnecting Paddle Engine"? At what place is the disconnecting effected? How is it accomplished? In which of the cranks of a disconnecting engine are the crank pins fixed?

104. Is link motion valve gear or the loose eccentric generally used for disconnecting paddle engines? For what steamers are disconnecting paddle engines frequently employed?

105. What are expansion joints? Where are they necessary? What attention do they require? Of what should the working surfaces be made?

106. What omission in the construction of expansion joints may lead to a serious accident when steam is first applied? How is this prevented in the construction of a steam trunnion pipe for an oscillating engine?

107. Describe an oil cup with a syphon worsted. How is the worsted arranged? How is it cleaned? How far down the tube does it extend?

108. Describe a thrust bearing; which of the surfaces wears? Why is there sometimes a number of oil tubes or one thrust bearing?

109. What parts of a screw shaft are generally covered with brass? Why is this necessary? About what thickness is the brass?

110. What is the stern tube or screw shaft pipe? Why is a pipe of such a length required? Of what is it made? How is it fixed at each end?

111. What is a *lignum vitae* bearing? How is the wood fitted? Where is such a bearing generally used?

112. How is a screw propeller fixed on the shaft? What means are used to prevent its getting loose at sea?

113. Where are sluice valves placed? What large sluice valve is there in almost all screw steamers? From what position should this valve be worked? Why so? What attention should it receive?

114. With a condensing engine what valves or cocks are on the skin of the ship in the engine-room and in the stokehold?

115. What are the necessary fittings of a marine boiler?

116. With a surface condensing engine what cocks or valves are opened some time before the engine is started so as to be ready for starting whenever the order is given?

117. What is a steam jacket? What cocks are on it? In what engines are jackets most generally used? Do they require to be felted?

118. What parts of an engine or its fittings should be felted or otherwise protected from radiation?

119. What are the small cylinders sometimes fitted on the slide valve casing cover of vertical engines? Explain their action. To what are they connected by a pipe? Why?

120. Name the principal pipes in connection with the engines and boilers of a steamer, and state to what the ends of these pipes are connected?

121. Through what cocks or valves, pipes and chambers does the water pass on its way from the sea inlet rose plate to the water space of the boiler, with a jet condenser?

122. Through what cocks or valves, pipes and chambers does the circulating water of a surface condenser pass?

123. Through what cocks or valves, pipes and chambers does the steam pass from the boiler until it is in the form of water in the hot well?

124. Name the pieces of the engine through which the pressure of the steam is transmitted from the piston to the screw propeller. Name them in the order in which they act.

125. What is an air vessel? How does it act? At what parts of an engine or of its fittings are air vessels generally applied?

126. What is the construction of a mudbox? Where should mudboxes be placed? Why are they necessary? How should the space be divided by the rose plate, and why?

127. What is a trunk engine? Why has it fallen into disuse?

128. What is an oscillating engine? For what steamers are oscillating engines generally adopted? Why? How is the steam conveyed to and from the slide valve casing?

129. Of what parts does the valve motion gear of an oscillating engine consist?

130. For what have geared engines sometimes been used? Of what were the cogs or the large wheel made?

131. At what part of a screw steamer is the pressure that propels it applied to the hull?

132. At what part of a paddle steamer is the pressure that propels it applied to the hull?

133. About how much fuel per indicated horse-power per hour is required by modern steam engines, common, compound, and triple expansion?

134. What is the explanation of the economy of the surface condenser?

135. What is the construction of a surface condenser? Of what are its tubes made? How are they fixed? How are they kept tight? What is done with a split tube?

136. Where do surface condensers foul? How are they cleaned?

137. What non-conducting substances are employed to prevent radiation, and how are they applied?

138. In the construction of smoke-box doors and of dry uptakes, what provision is made to lessen the amount of radiation?

139. How can the formation of excessive smoke be prevented? Describe smoke preventing apparatus.

140. What is meant by "circulation" in a boiler, and what are the results of defective circulation?

141. What means are sometimes adopted to improve the circulation in a boiler?

142. By what arrangement is the circulation promoted in a "hay-stack" boiler?

143. Describe a ship's side air-pump discharge valve. In what respects does it sometimes differ from a common stop-valve, and what attention does it require?

144. What is the construction of a feed escape valve, to what is its discharge connected, and how is its loading regulated? Where should the escaping water flow?

145. When there is no feed escape valve, what is the arrangement of the feed valves or cocks?

146. What is the measure of a horse-power? How is indicated horse-power ascertained?

147. Has "nominal horse-power" a fixed meaning? What is the use of this expression? What is generally taken as the measure of one horse-power nominal?

148. What is "back pressure" in a cylinder? About how much is it in each of the cylinders in your last steamer? Is excessive cushioning ever a trouble under certain conditions in modern engines? Say when and why and in which cylinder this occurs.

149. What is meant by "speed of piston"? About how much is the speed of piston in modern marine engines?

150. What is "atmospheric pressure"? What is its average amount? What instrument tells this amount?

151. What is "gross pressure" or "absolute pressure"? What pressure is it that is shown by the steam gauge?

152. What is meant by "cutting off" steam? How is it done? What part of the valve regulates the cut off?

153. What is a piston slide valve? Describe its construction. Why are they frequently employed in place of the common slide valve? Have they any disadvantages compared with a common slide valve? If so, name them.

154. What fixes the time of closing the exhaust? After the exhaust is closed and before the port opens for steam, what becomes of the steam that is in the cylinder?

155. What is the "lead" of the valve? What is its object? About that amount is it?

156. What is the "cover" or "lap" of the valve? What is its object? About what proportion of the stroke of the valve is it made?

157. What is the "exhaust cover" of a slide valve? What is its effect upon cushioning and upon exhaust?

158. What is "minus cover" or "minus lap" on the exhaust? What is its effect upon the exhaust and upon cushioning?

159. What is "cushioning" or "compression" in a steam cylinder? How is it affected by the amount of cover or of minus cover there may be upon the exhaust? How is it affected by the exhaust pressure?

160. What is "mean effective pressure"? How is its amount ascertained?

161. What is a dial vacuum gauge? What is its construction? For what is it used? About what amount should it show when the engine is working all right? What effect have the variations it indicates on the performance of the engine?

162. Does the vacuum gauge enable you to tell what pressure there is in the condenser, or must you have recourse also to the barometer to arrive at that? How would you ascertain the actual amount of back pressure there is in the condenser?

163. What is a barometer? What is its construction? Is a barometer sometimes used instead of a vacuum gauge? In what respect does the weather barometer differ from the vacuum gauge barometer?

164. The common vacuum gauge and the common steam gauge, in which of them are the graduations marked from atmospheric pressure? Does either of them tell what is the true actual pressure in the boiler or in the condenser?

165. Do steam and vacuum gauges vary with the variations of the weather barometer? When the weather barometer varies from 29 to 31 how much will the vacuum gauge vary and how will that affect the working of the engine? Why?

166. Vacuum is generally stated as so many inches. What is meant by, say, 20 inches vacuum? What does that tell us about the absolute pressure of the vapour then in the condenser?

167. From what depth will a pump draw water? Is there any limit? Why?

168. What is vacuum? Can vacuum move a piston? When the temperature of the water in the condenser is 212° Fahrenheit, what is the greatest degree of vacuum there can then be in the condenser?

169. What is a thermometer? What is its construction? What is the property of matter that is the principle of its construction? What temperatures are regularly noted by careful Engineers?

170. What is the temperature of (1) melting ice, (2) boiling water, (3) steam about 60 lbs. pressure by the steam gauge, (4) steam about 100 lbs., (5) steam about 150 lbs., (6) smoke in the funnel, (7) water in the hot well?

171. What is meant by the "conduction" of heat? Give examples of it in the boiler and in the engine.

172. What is meant by the "convection" of heat? Give examples of it in the boiler and in the engine.

173. What is meant by "radiation" of heat? Give examples of it in the boiler and in the engine.

174. Which is convection, which is radiation, and which is conduction in the following cases:—(1) Heat from the glowing fuel to the furnace crown? (2) Heat passing from one side of the furnace crown plate to the other? (3) Heat passing from the steam pipes in the engine-room? The heat of evaporation?

175. What are the effective heating surfaces of a marine boiler?

176. What parts of a marine engine are exposed to danger when the temperature is below freezing point?

177. What precautions are necessary in cold climates when the temperature is below freezing point?
